and spring

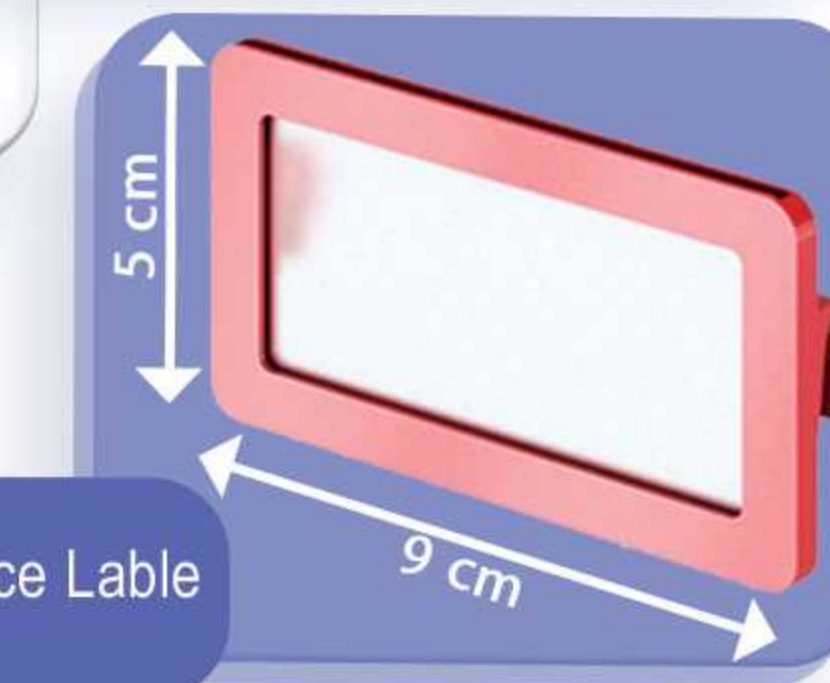

Price cassette

Ability to adjust the angle
Suitable for dry fruits and protein

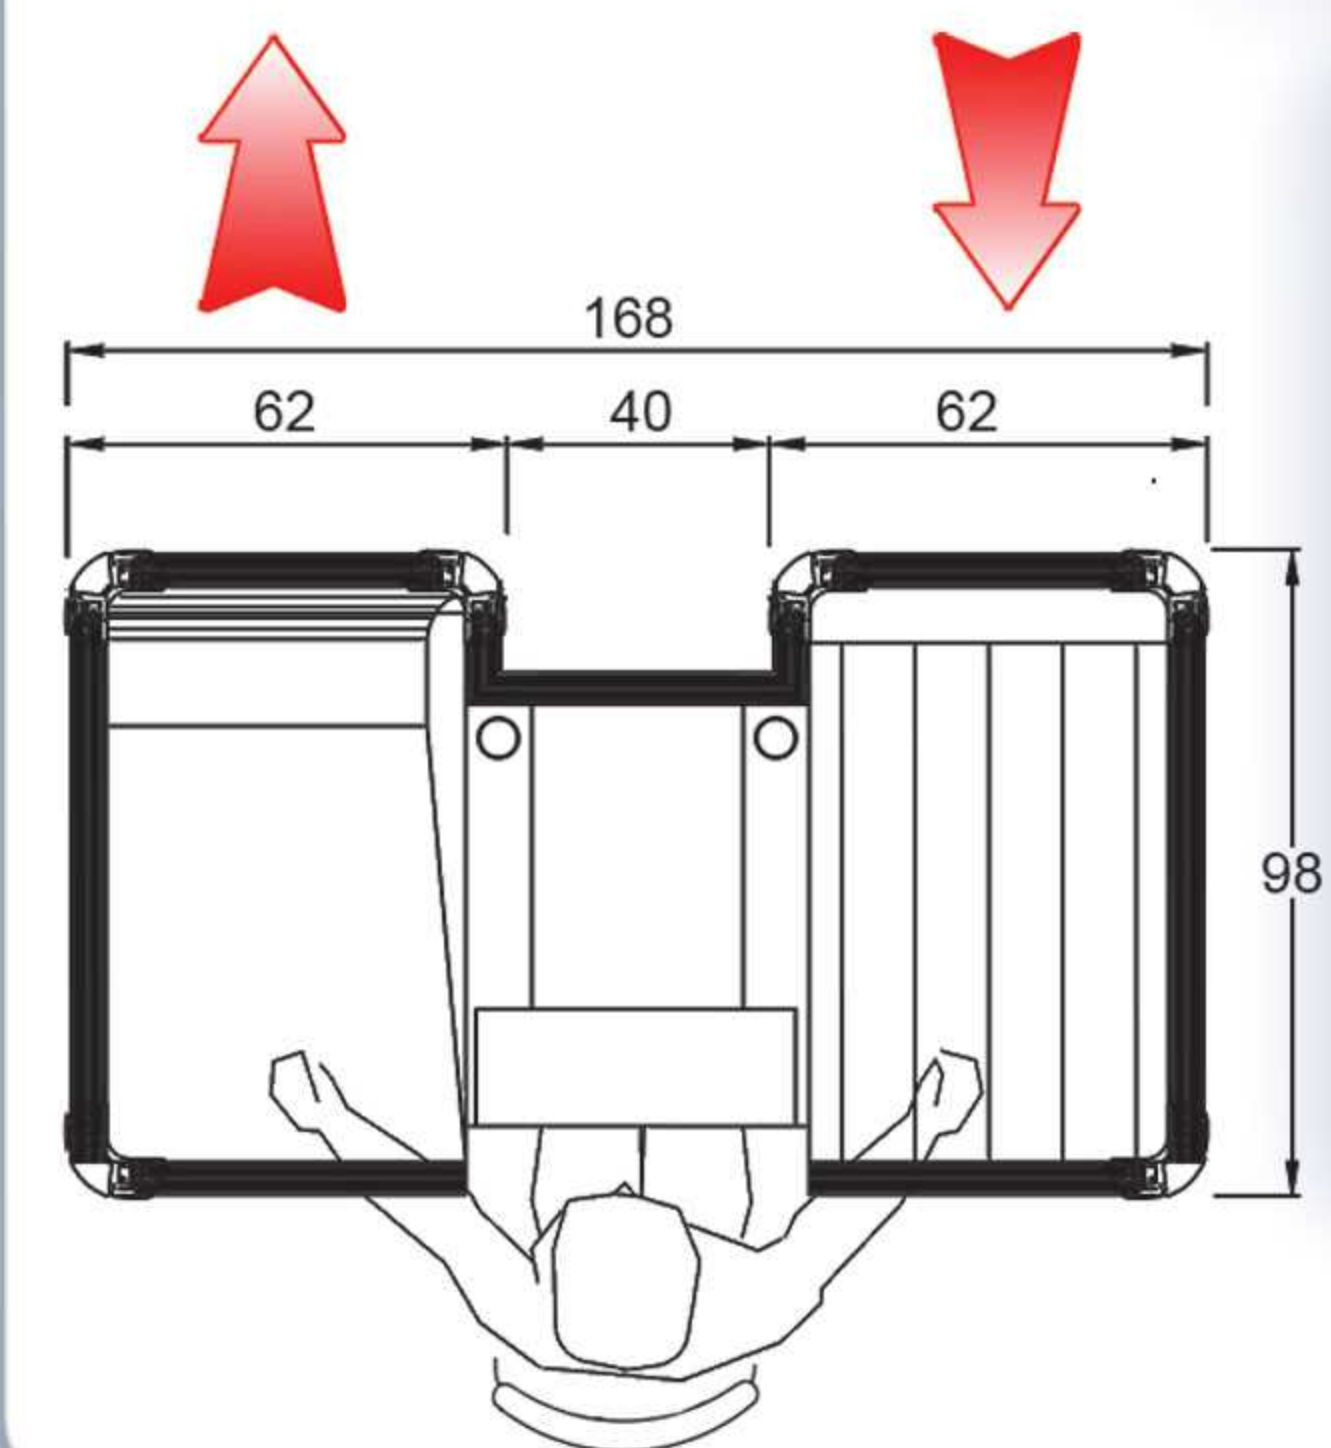

Wire Fence Lable

The ability to connect to the protective fence
and wire shelves

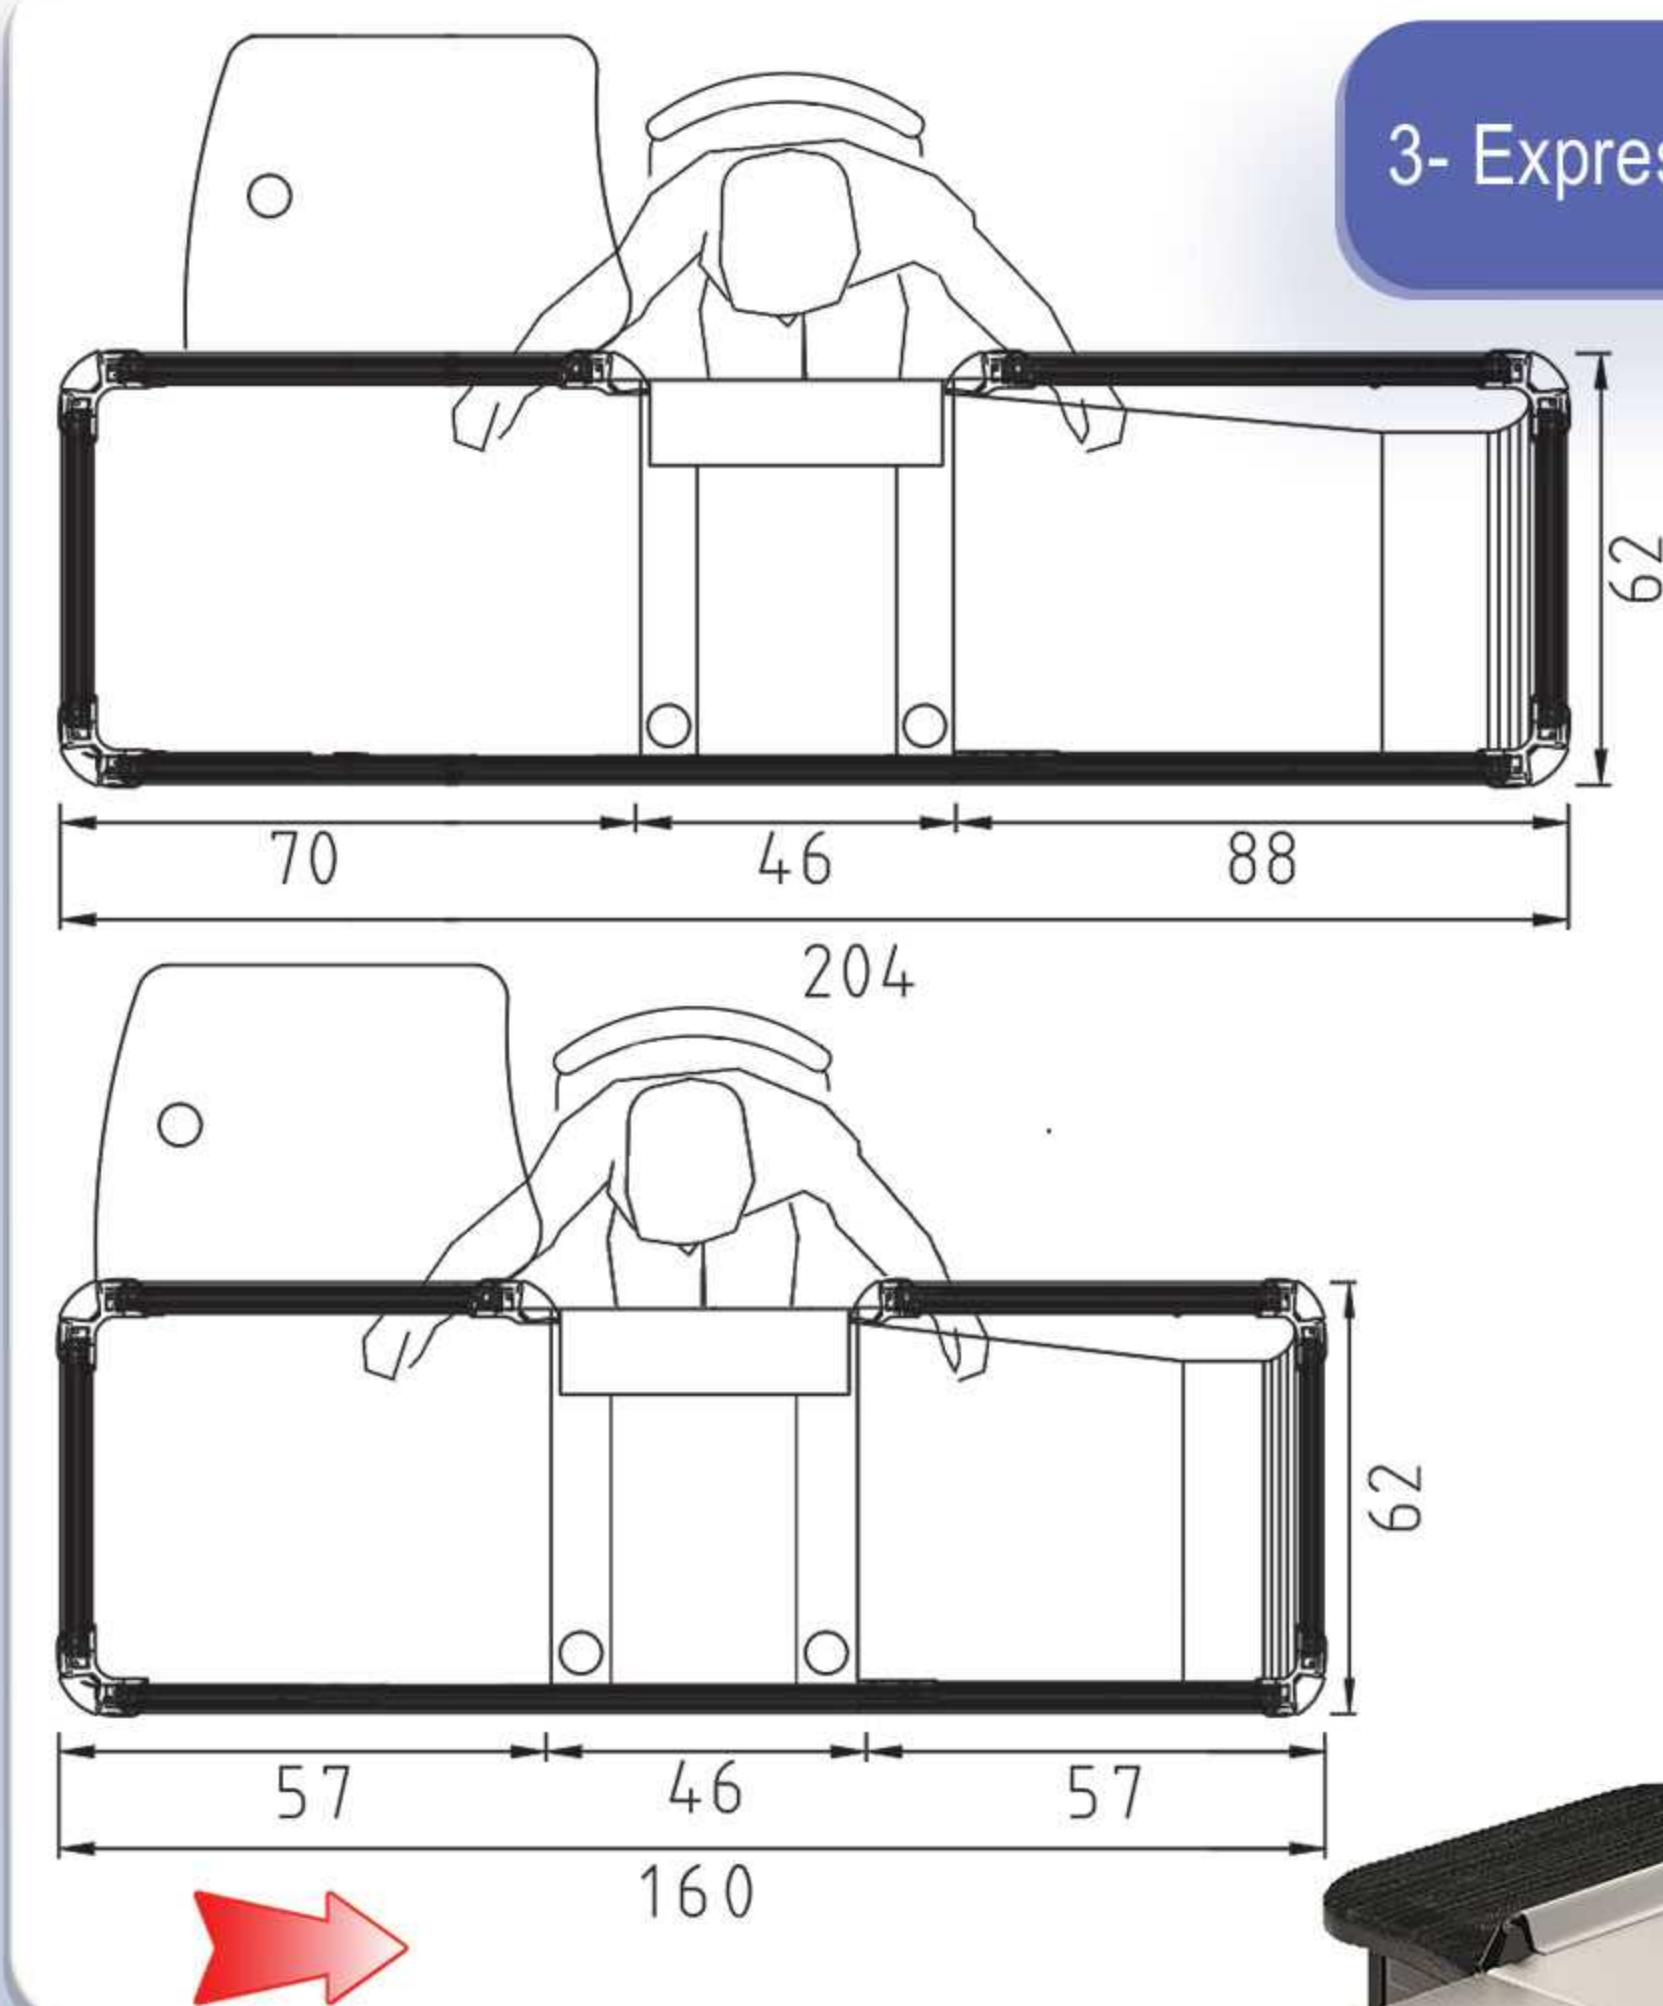

4- Express Check-out Counter Model W-series

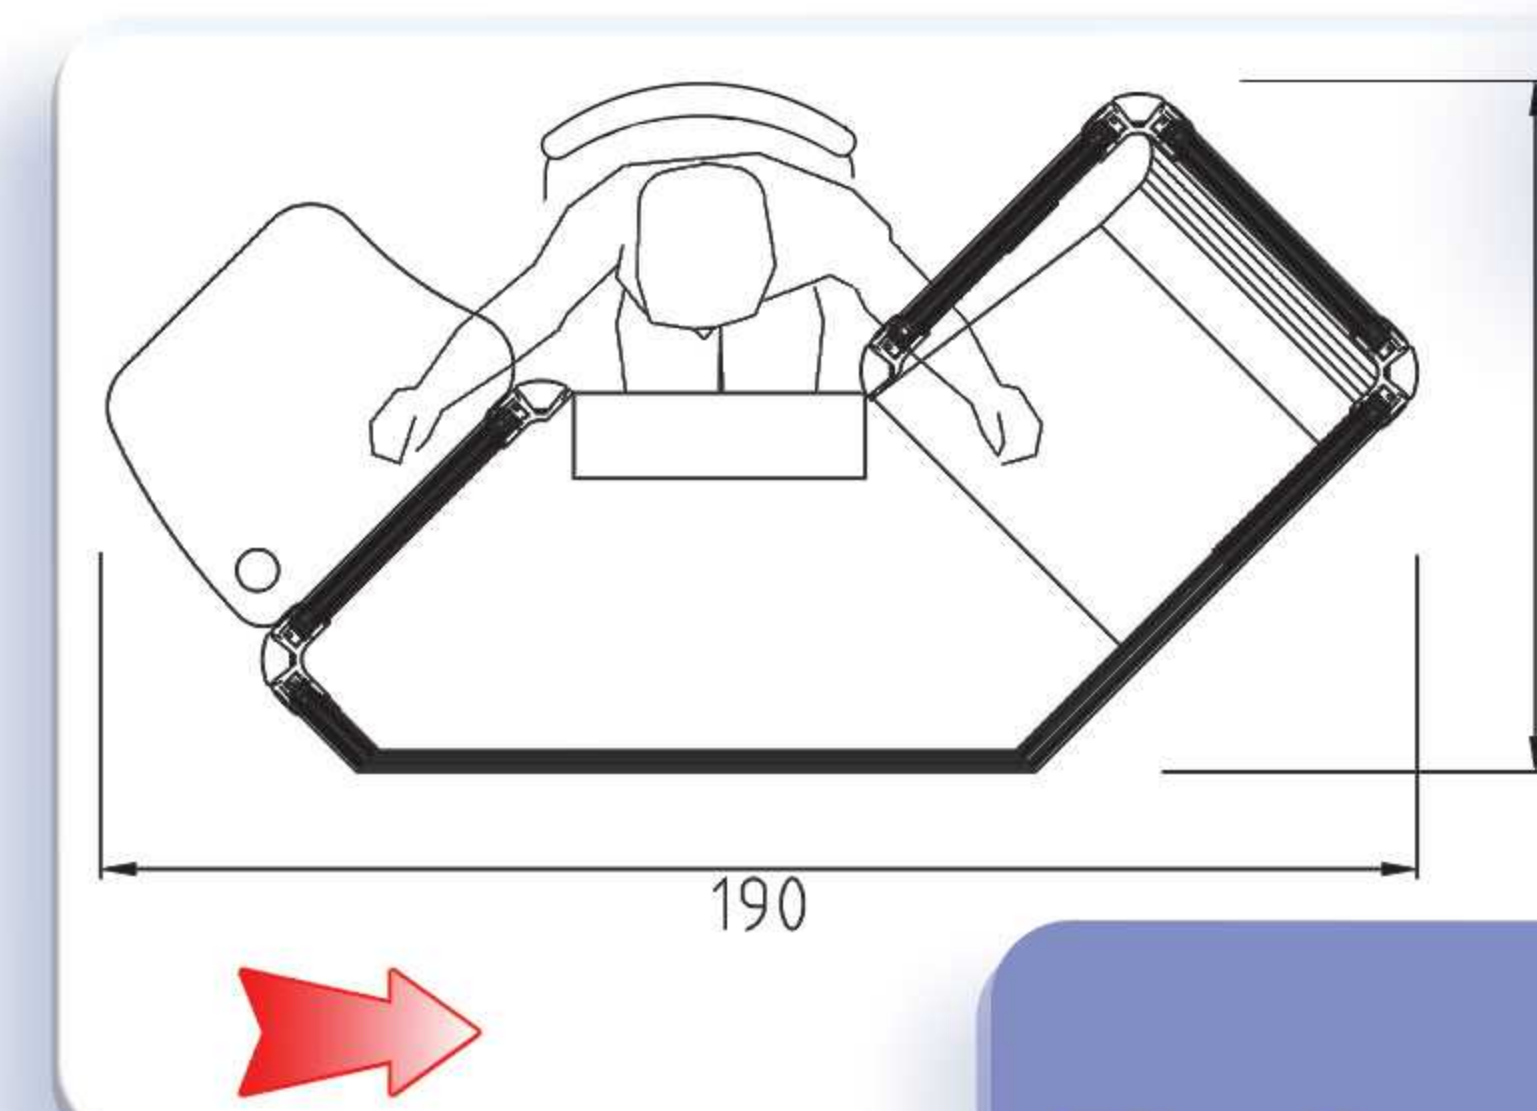

This checkout meet modern-day shop floor requirements, which demand maximum practicality within a small space.

3- Express Check-out Counter Model I-series

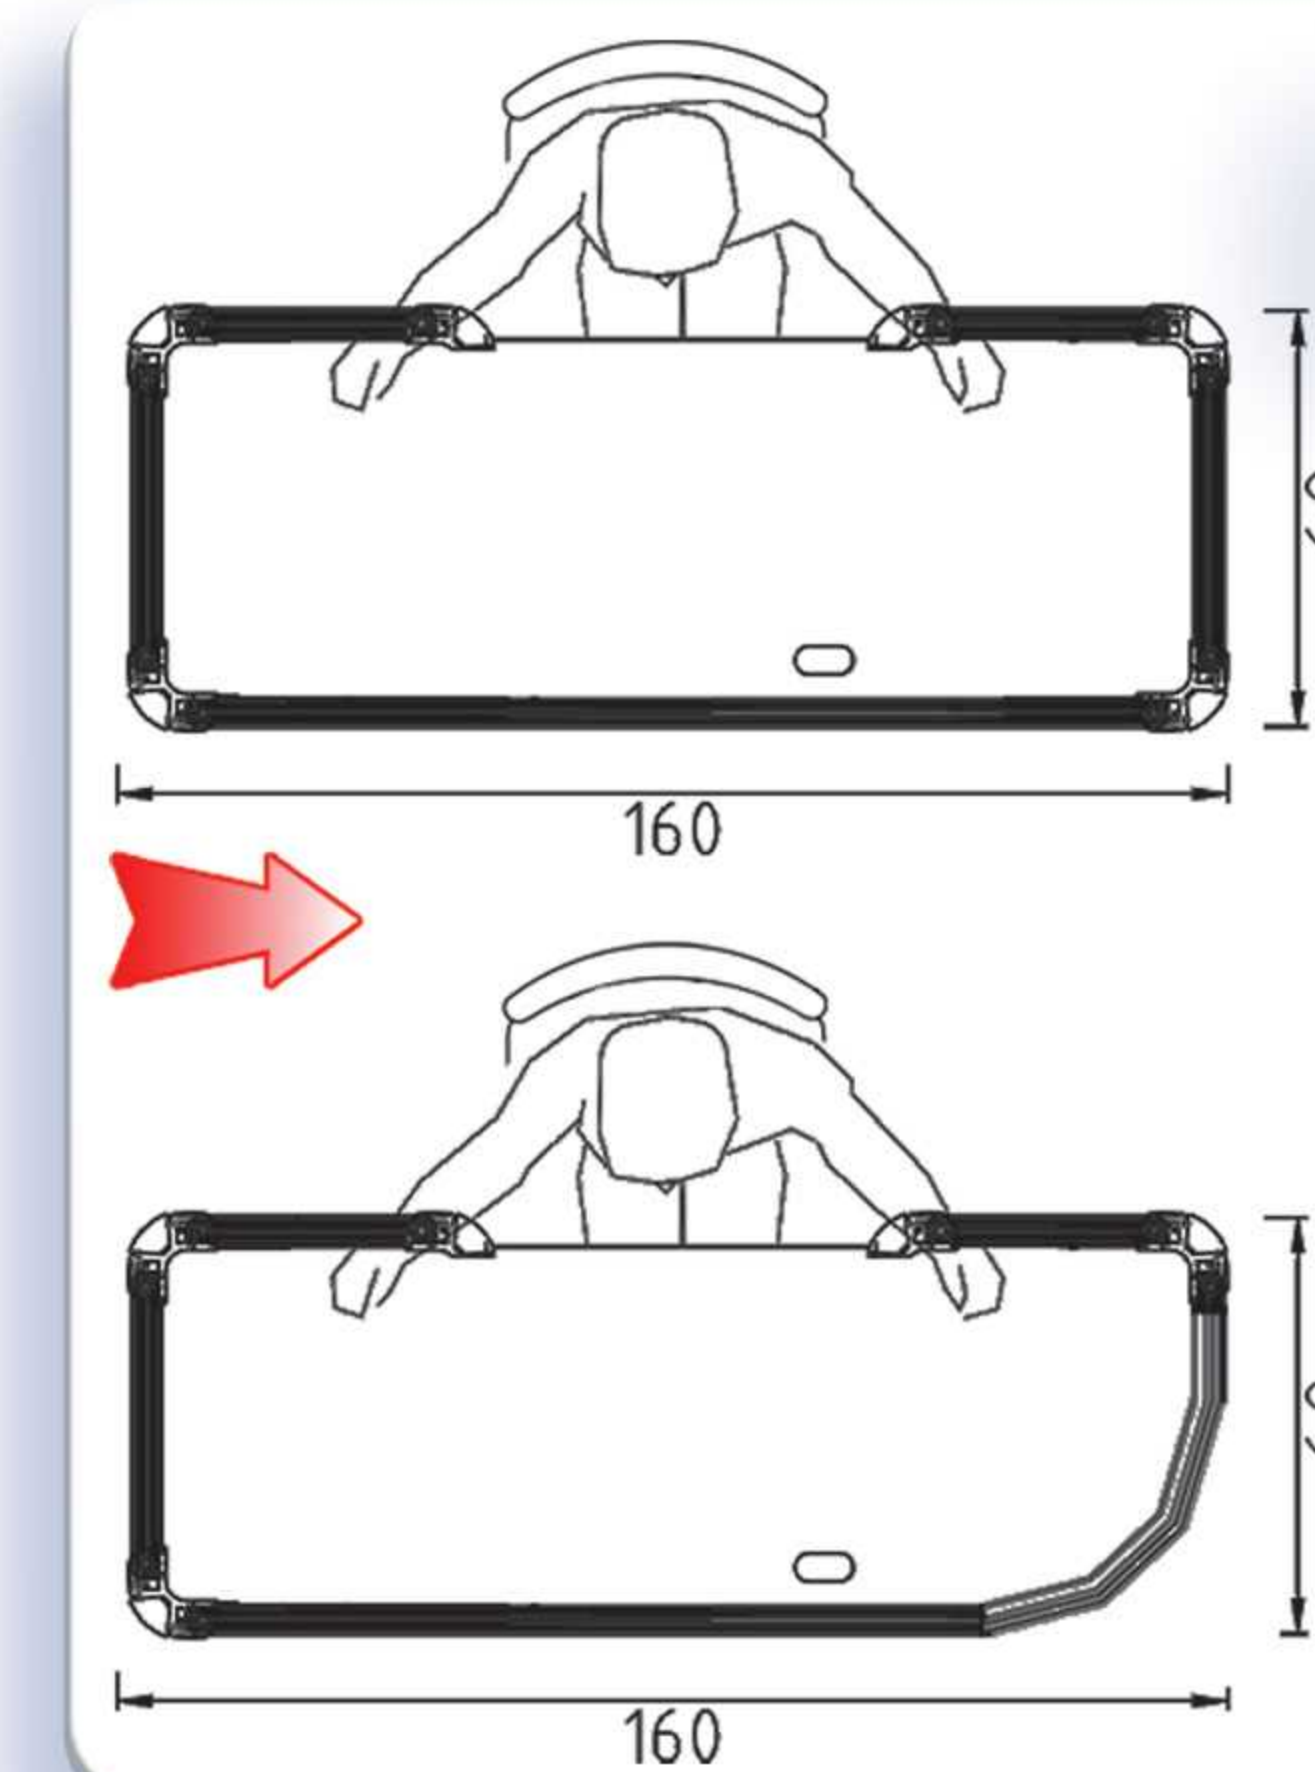

- Without Conveyor
- With In-counter Barcode Scanner Place & Cash Drawer as optional
- More Goods Upload Space

2- Express Check-out Counter Model C-series

- Without Conveyor
- With In-counter Barcode Scanner Place & Cash Drawer as optional
- More User Security and Customer Passing because of its Structure

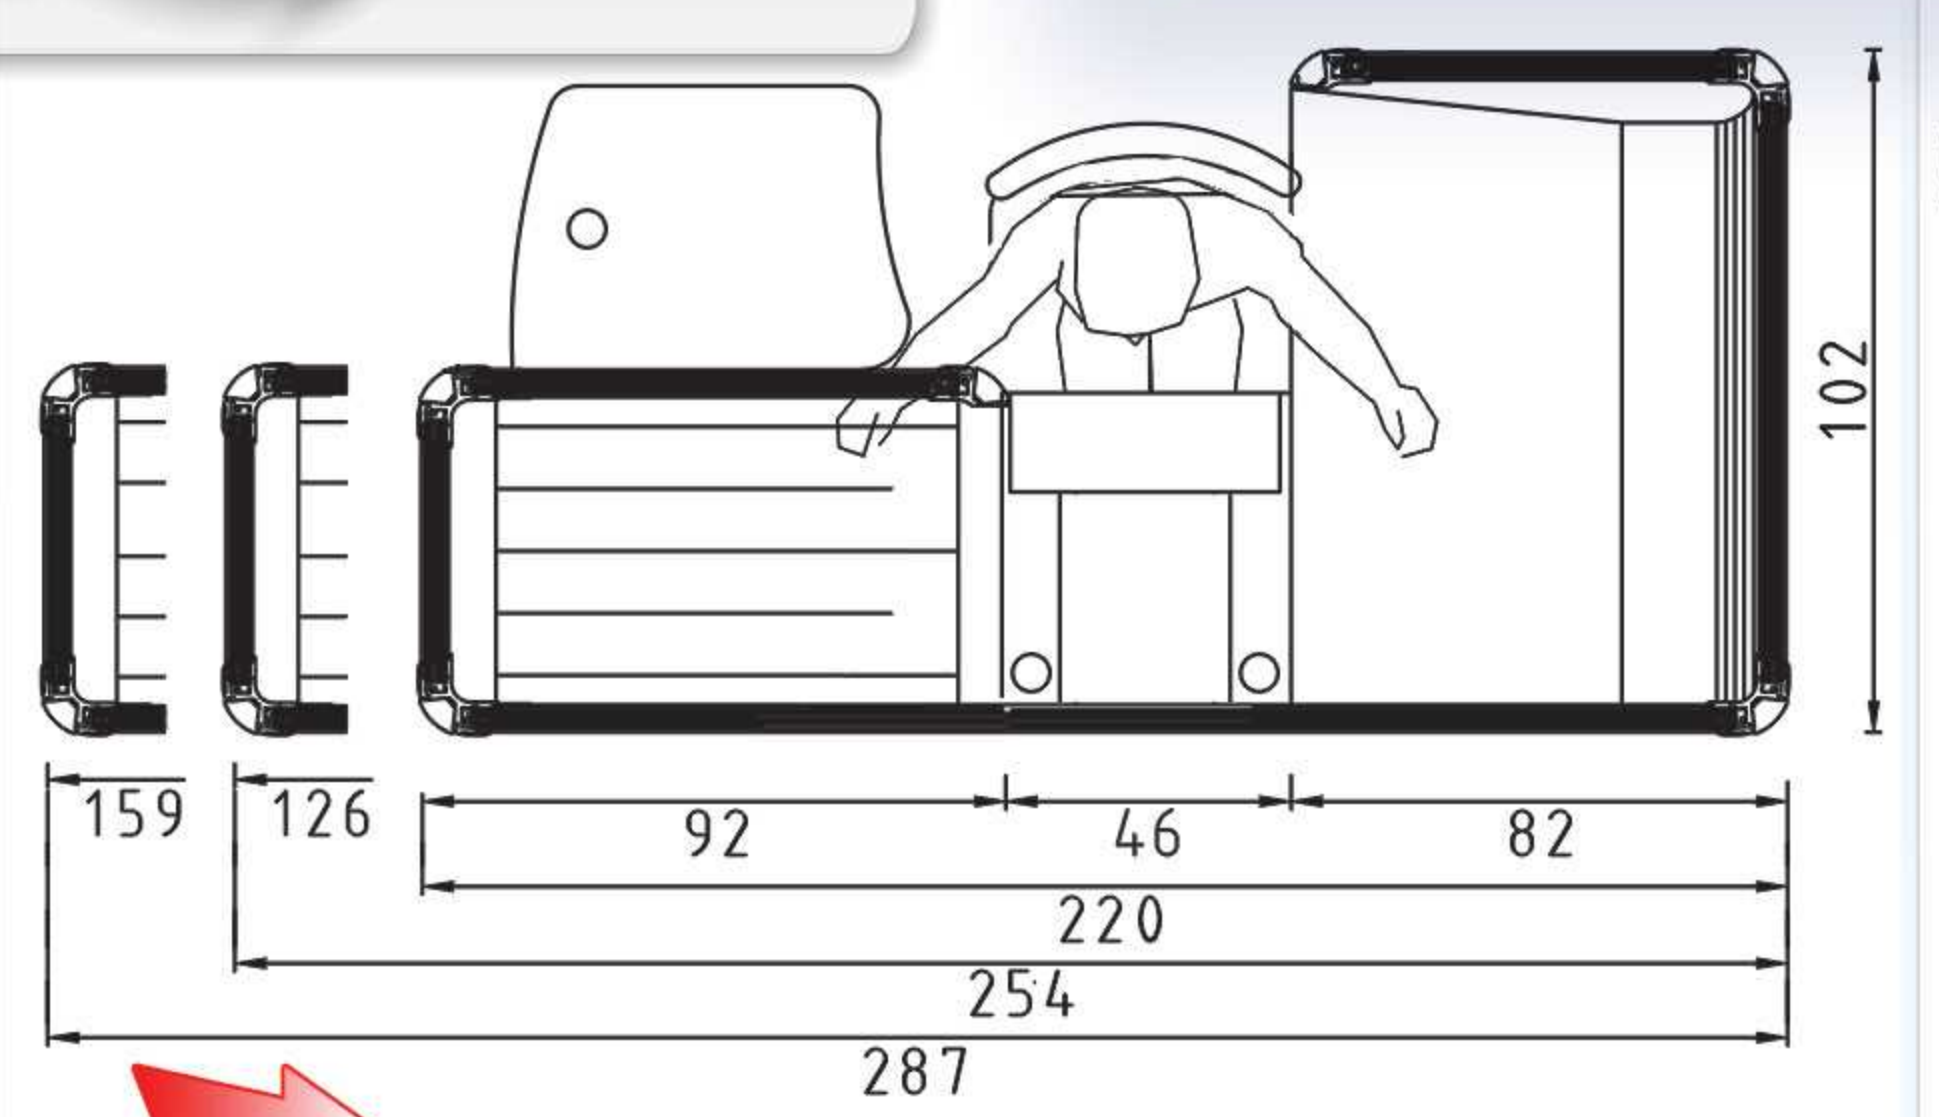

1- Express Check-out Counter Model I-series

- Without Conveyor and Basin
- In-counter Barcode Scanner Place & Cash Drawer as Optional

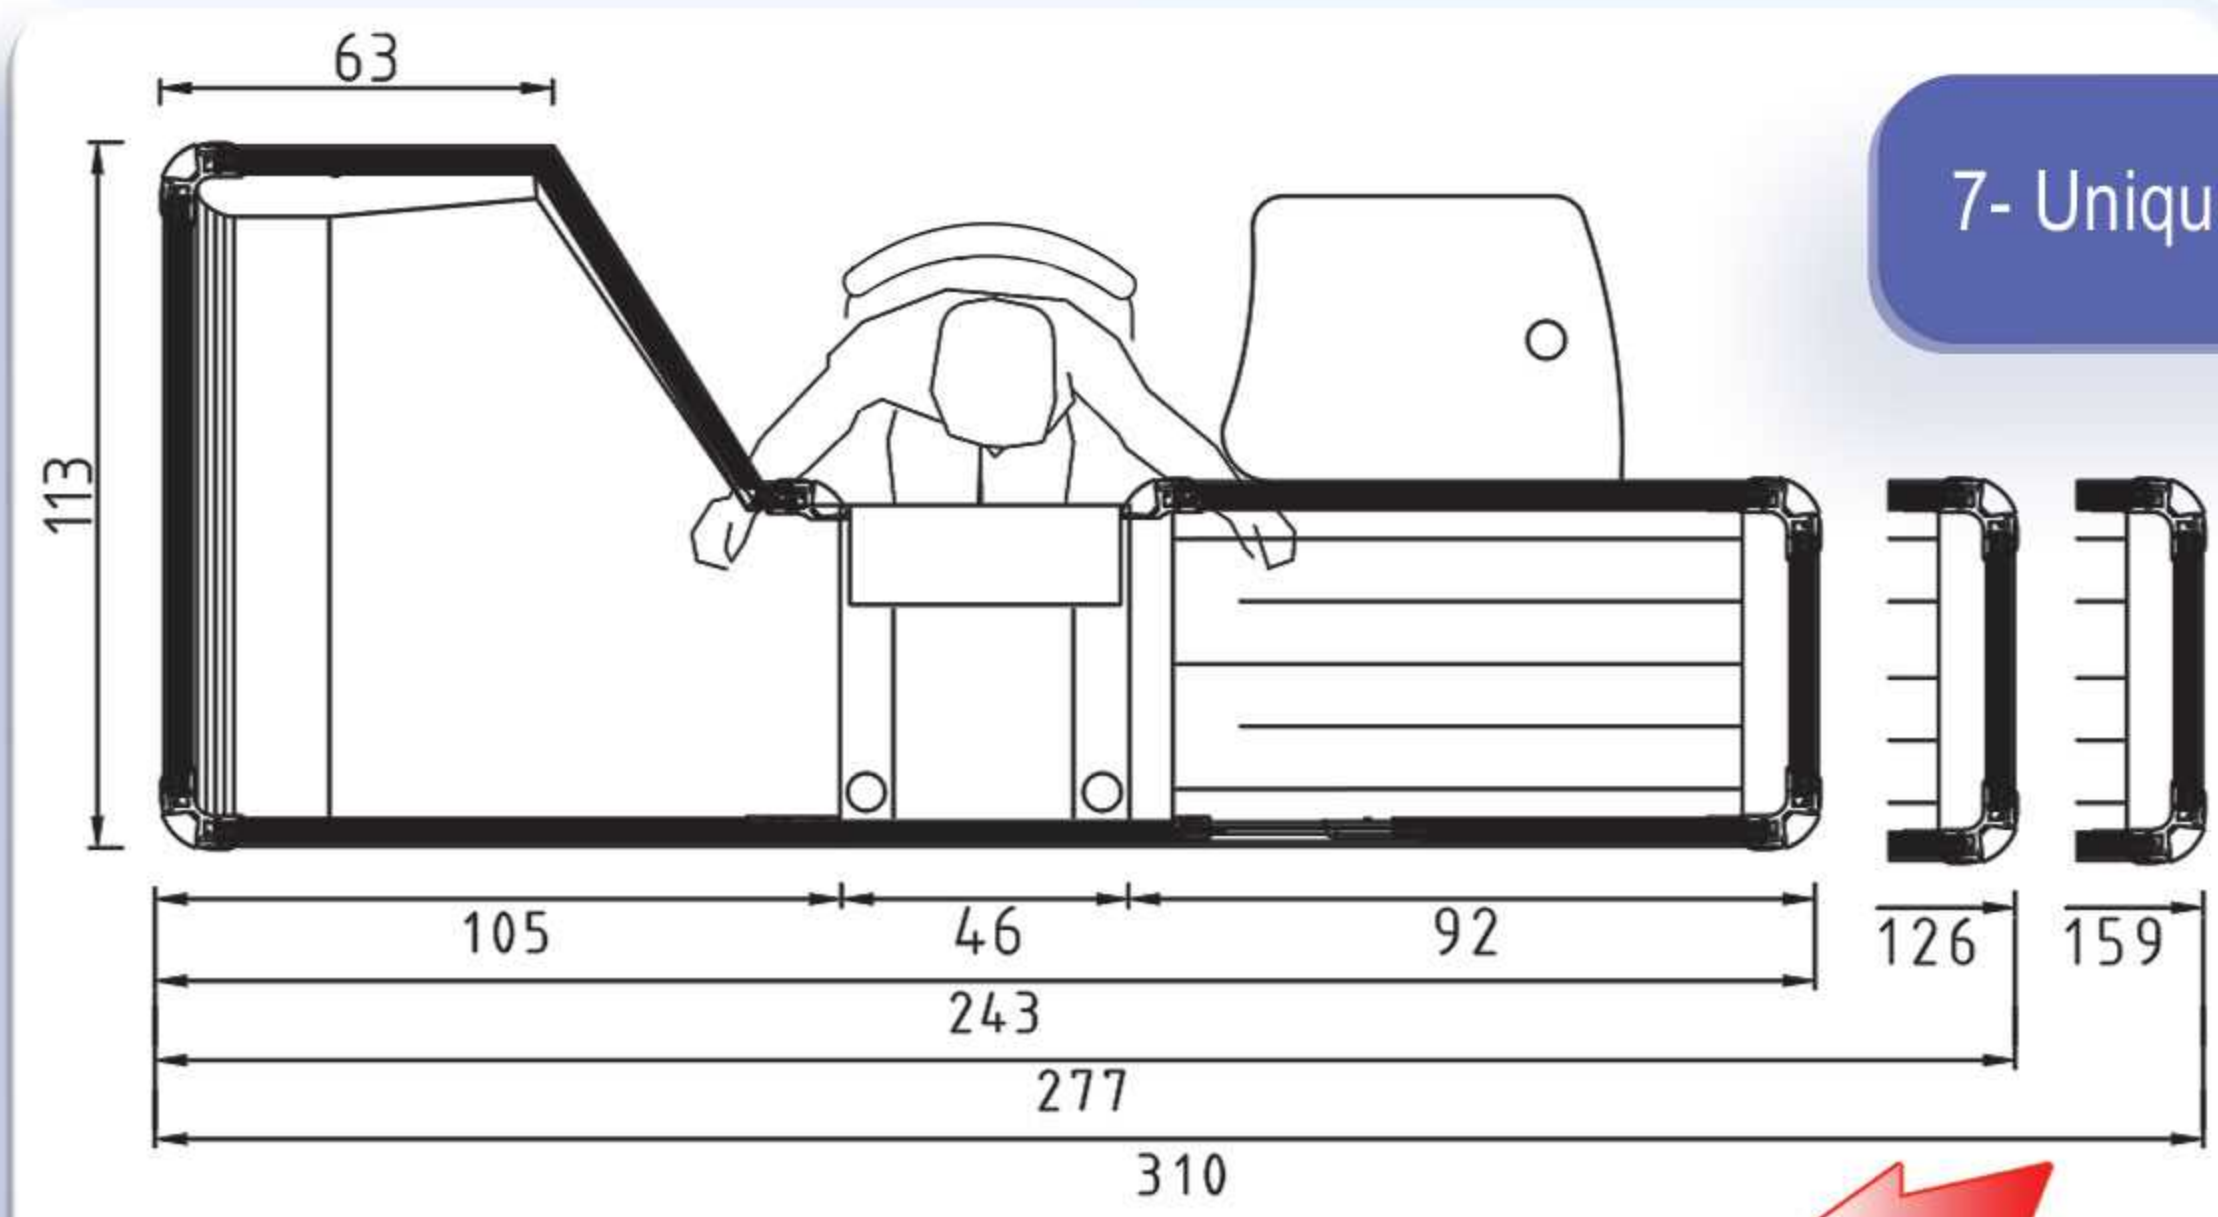

8- Unique Check-out Counter Model L-series

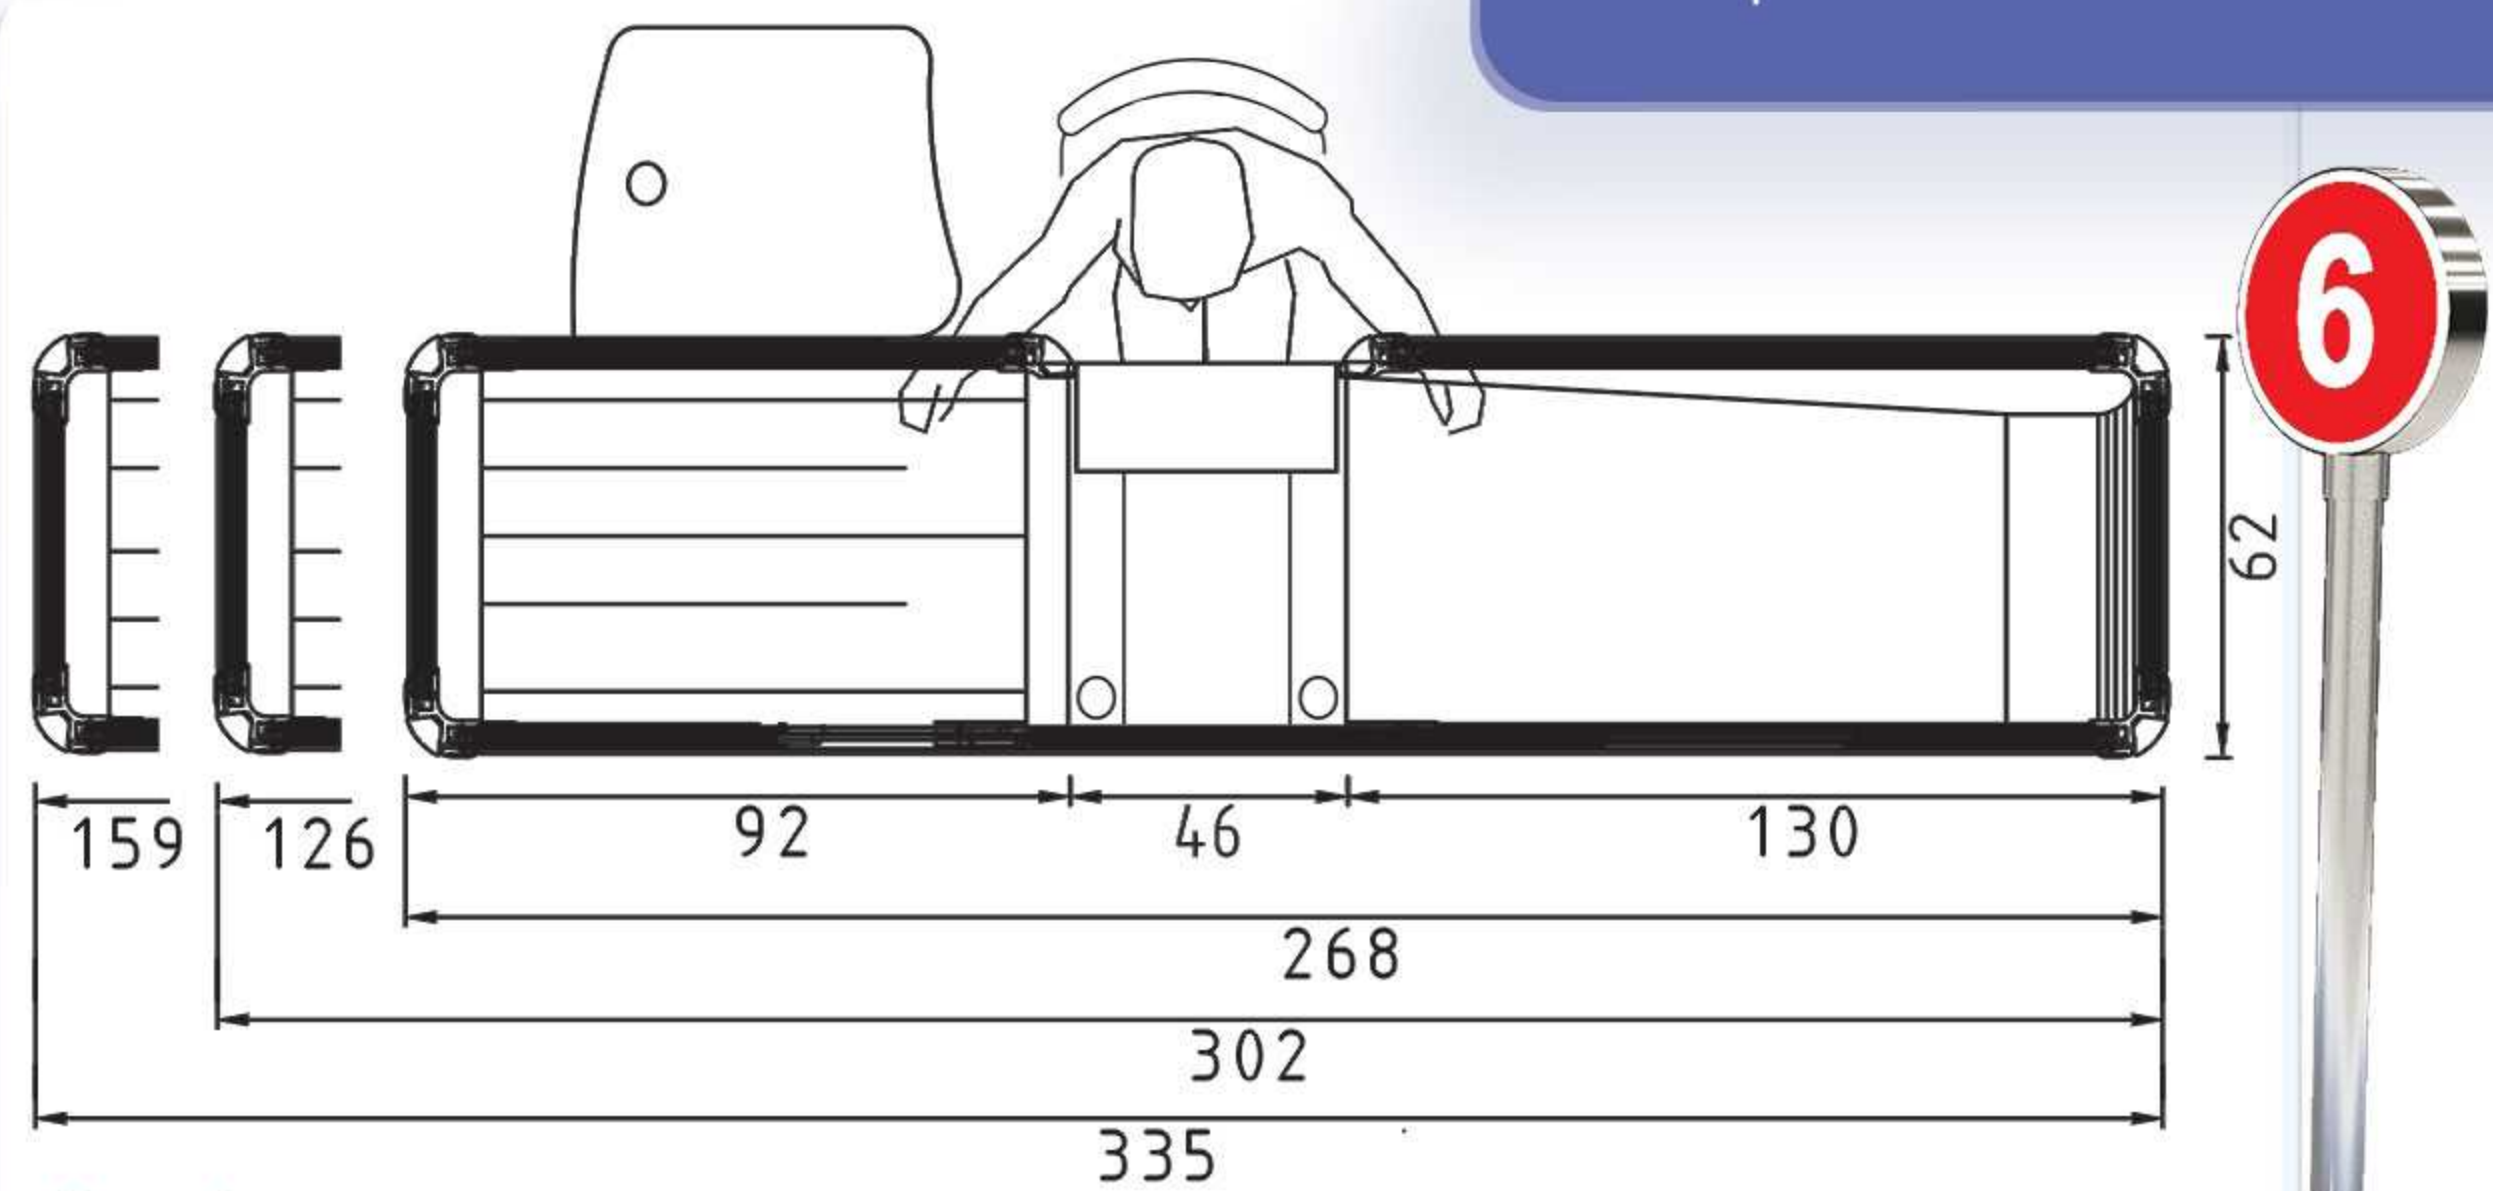

More efficient design for tighter spaces, beside all the model 7 options

7- Unique Check-out Counter Model L-series

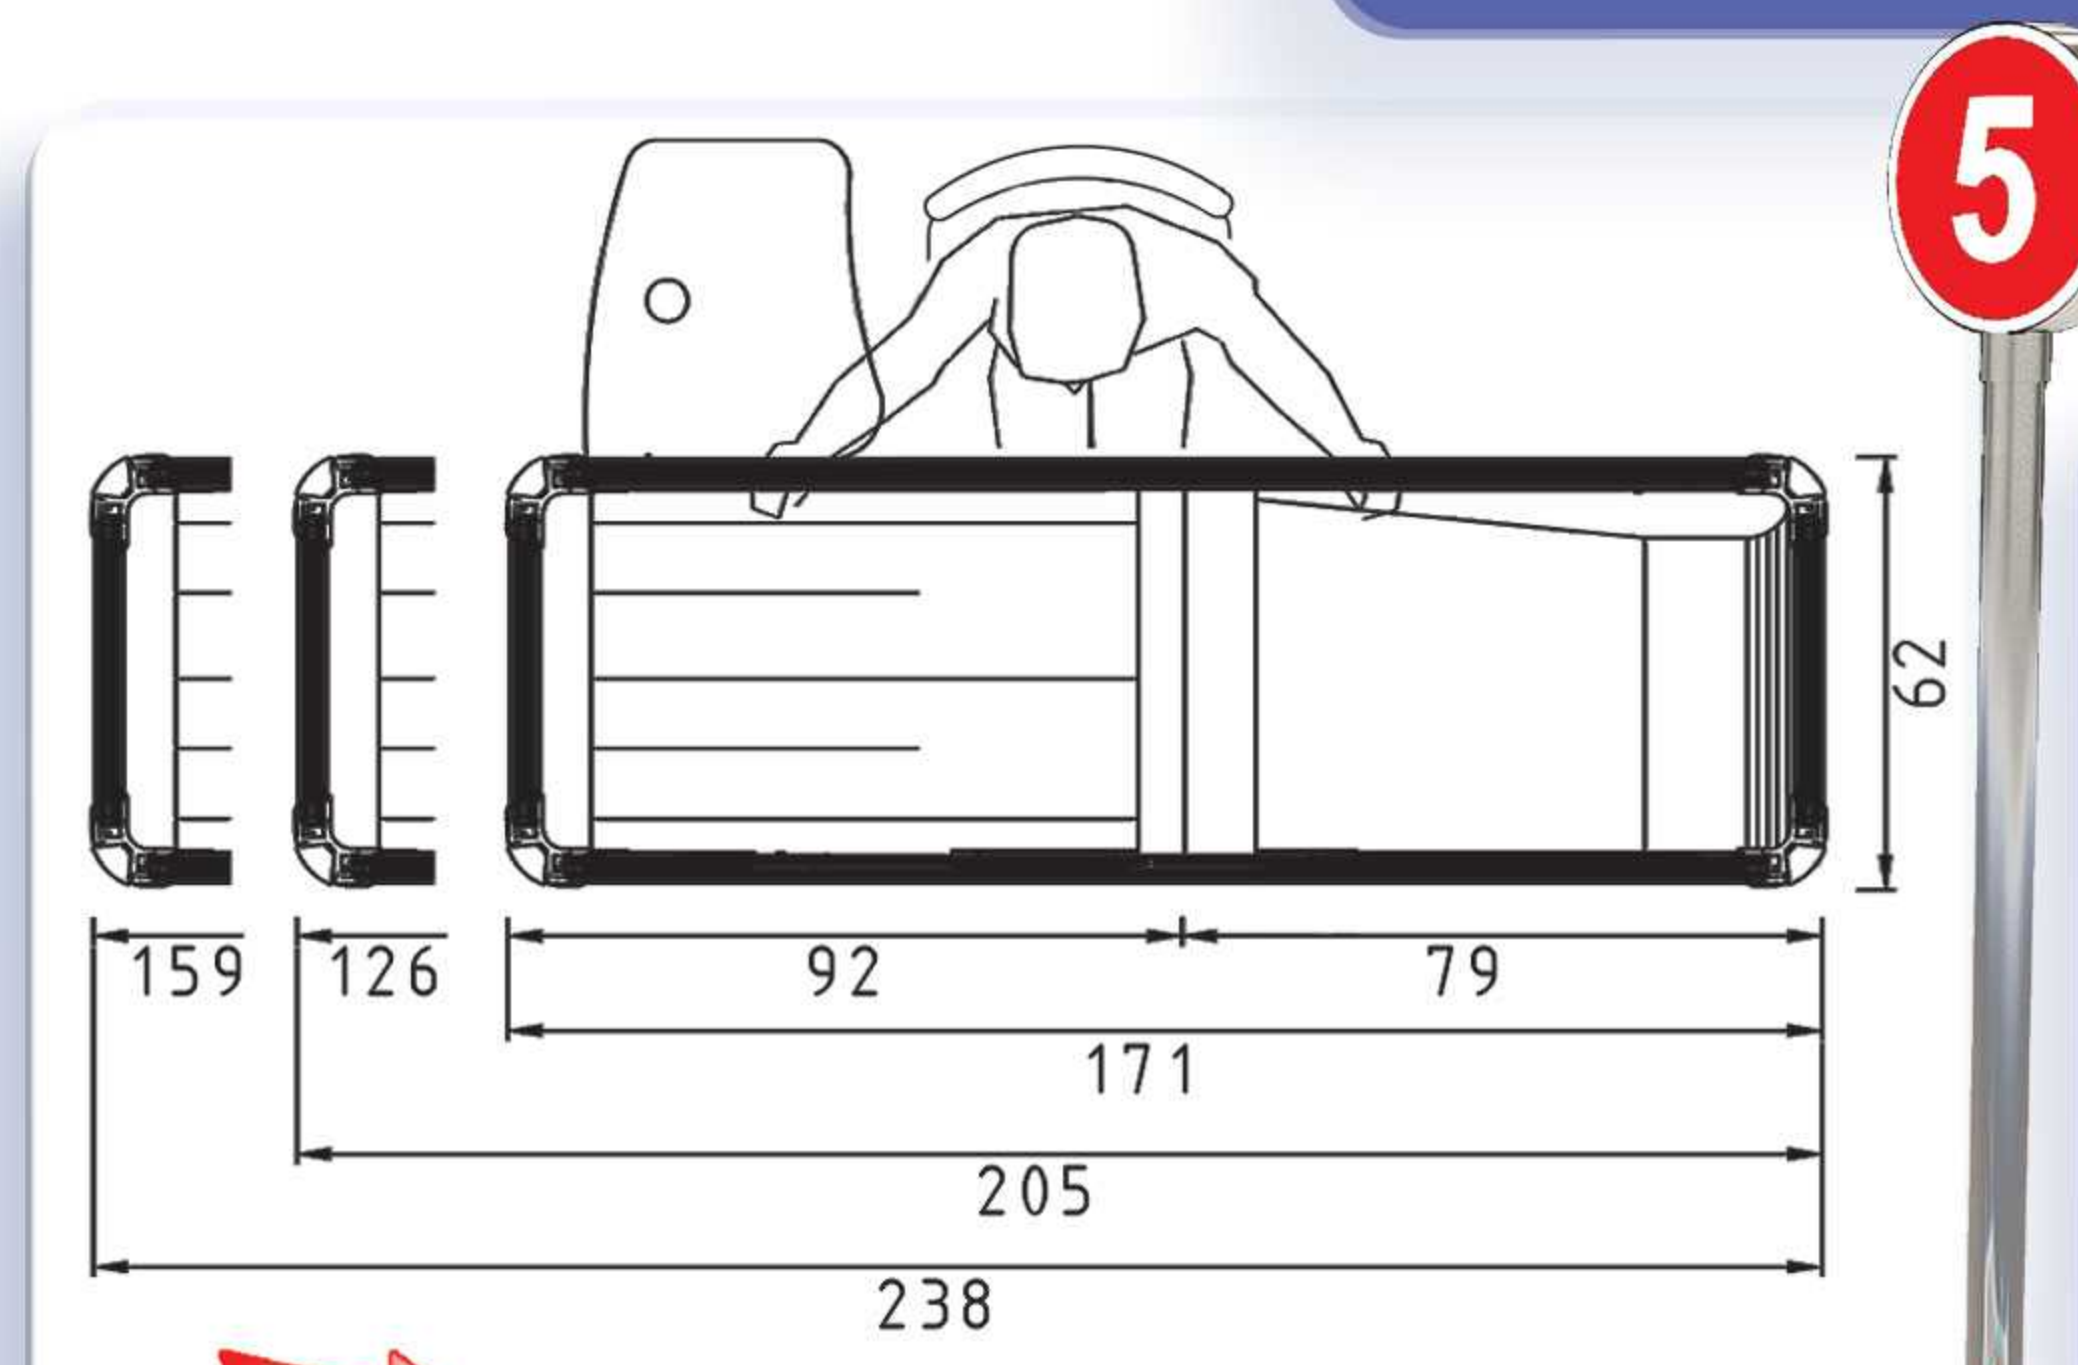

- With Front Work Table, Cash Drawer & In-counter Barcode Scanner Place
- Supermarket Utility because of its length and design
- in three different conveyor sizes
- wider Basin Volume

6- Unique Check-out Counter Model I-series

- With Front Work Table, Cash Drawer & In-counter Barcode Scanner Place
- more Basin Volume

5- Unique Check-out Counter Model I-series

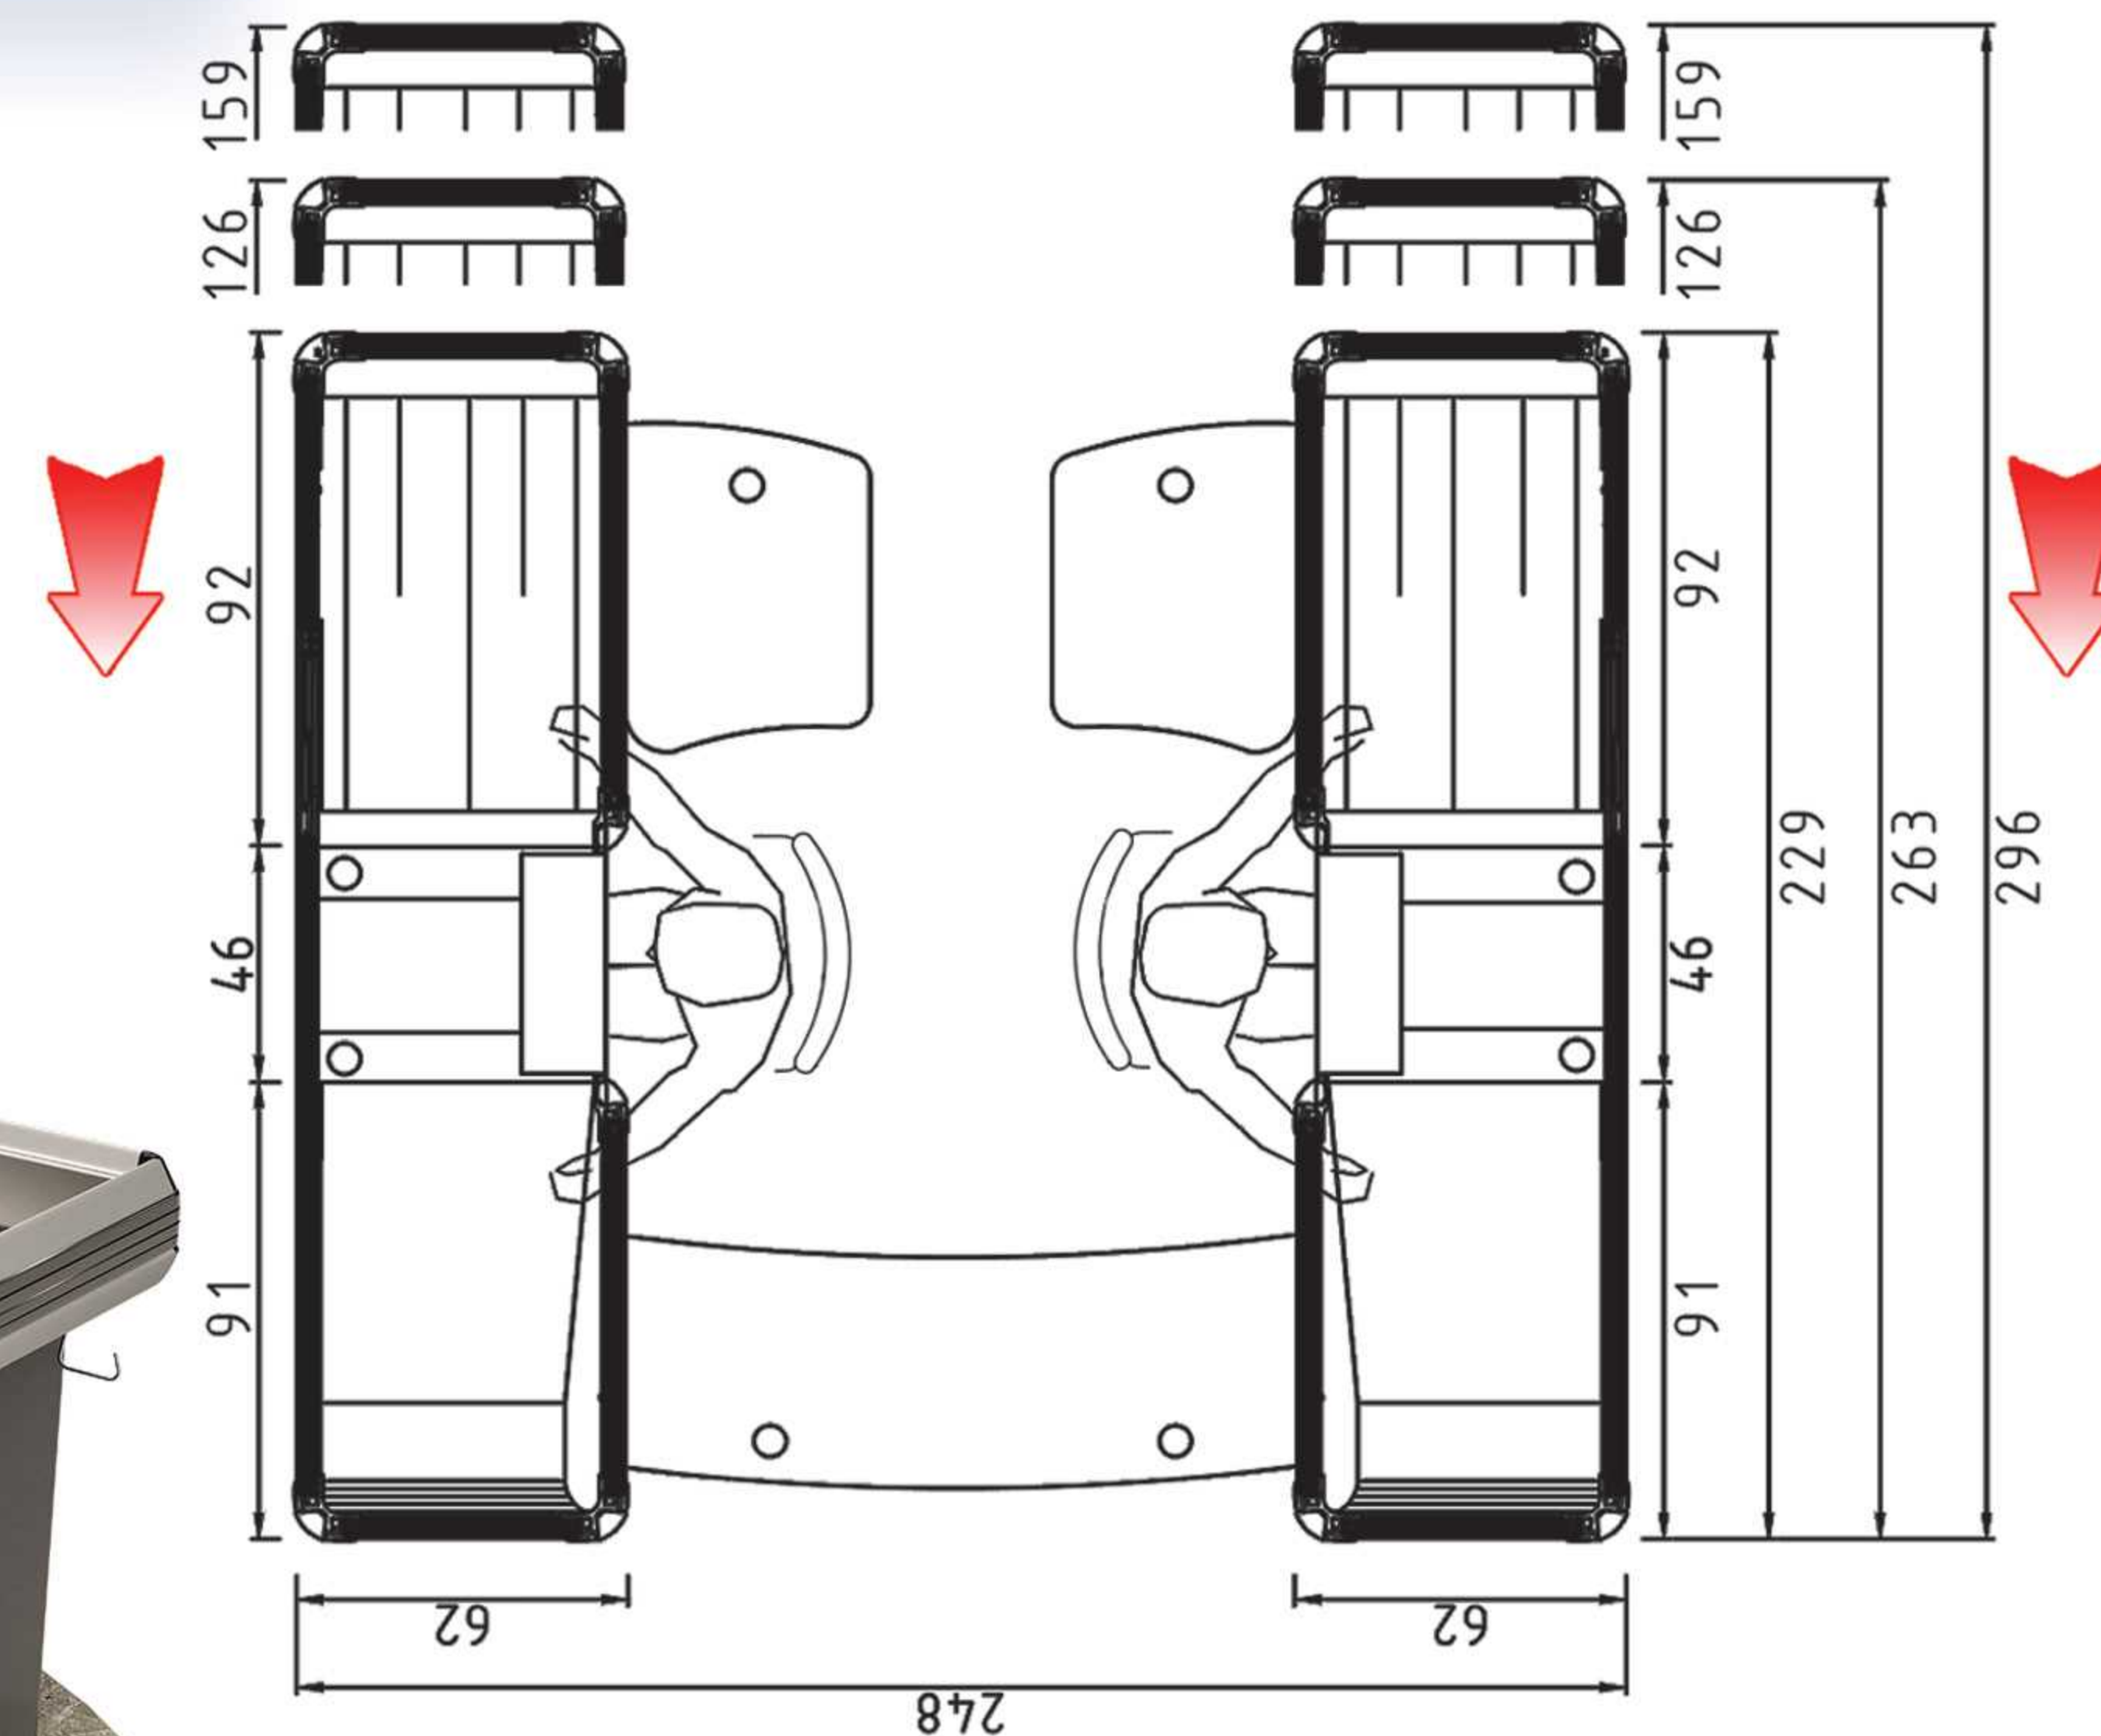

- Without Front Work Table
- Without In-counter Barcode Scanner Place & Cash Drawer
- Longer conveyor along with outer shorter length

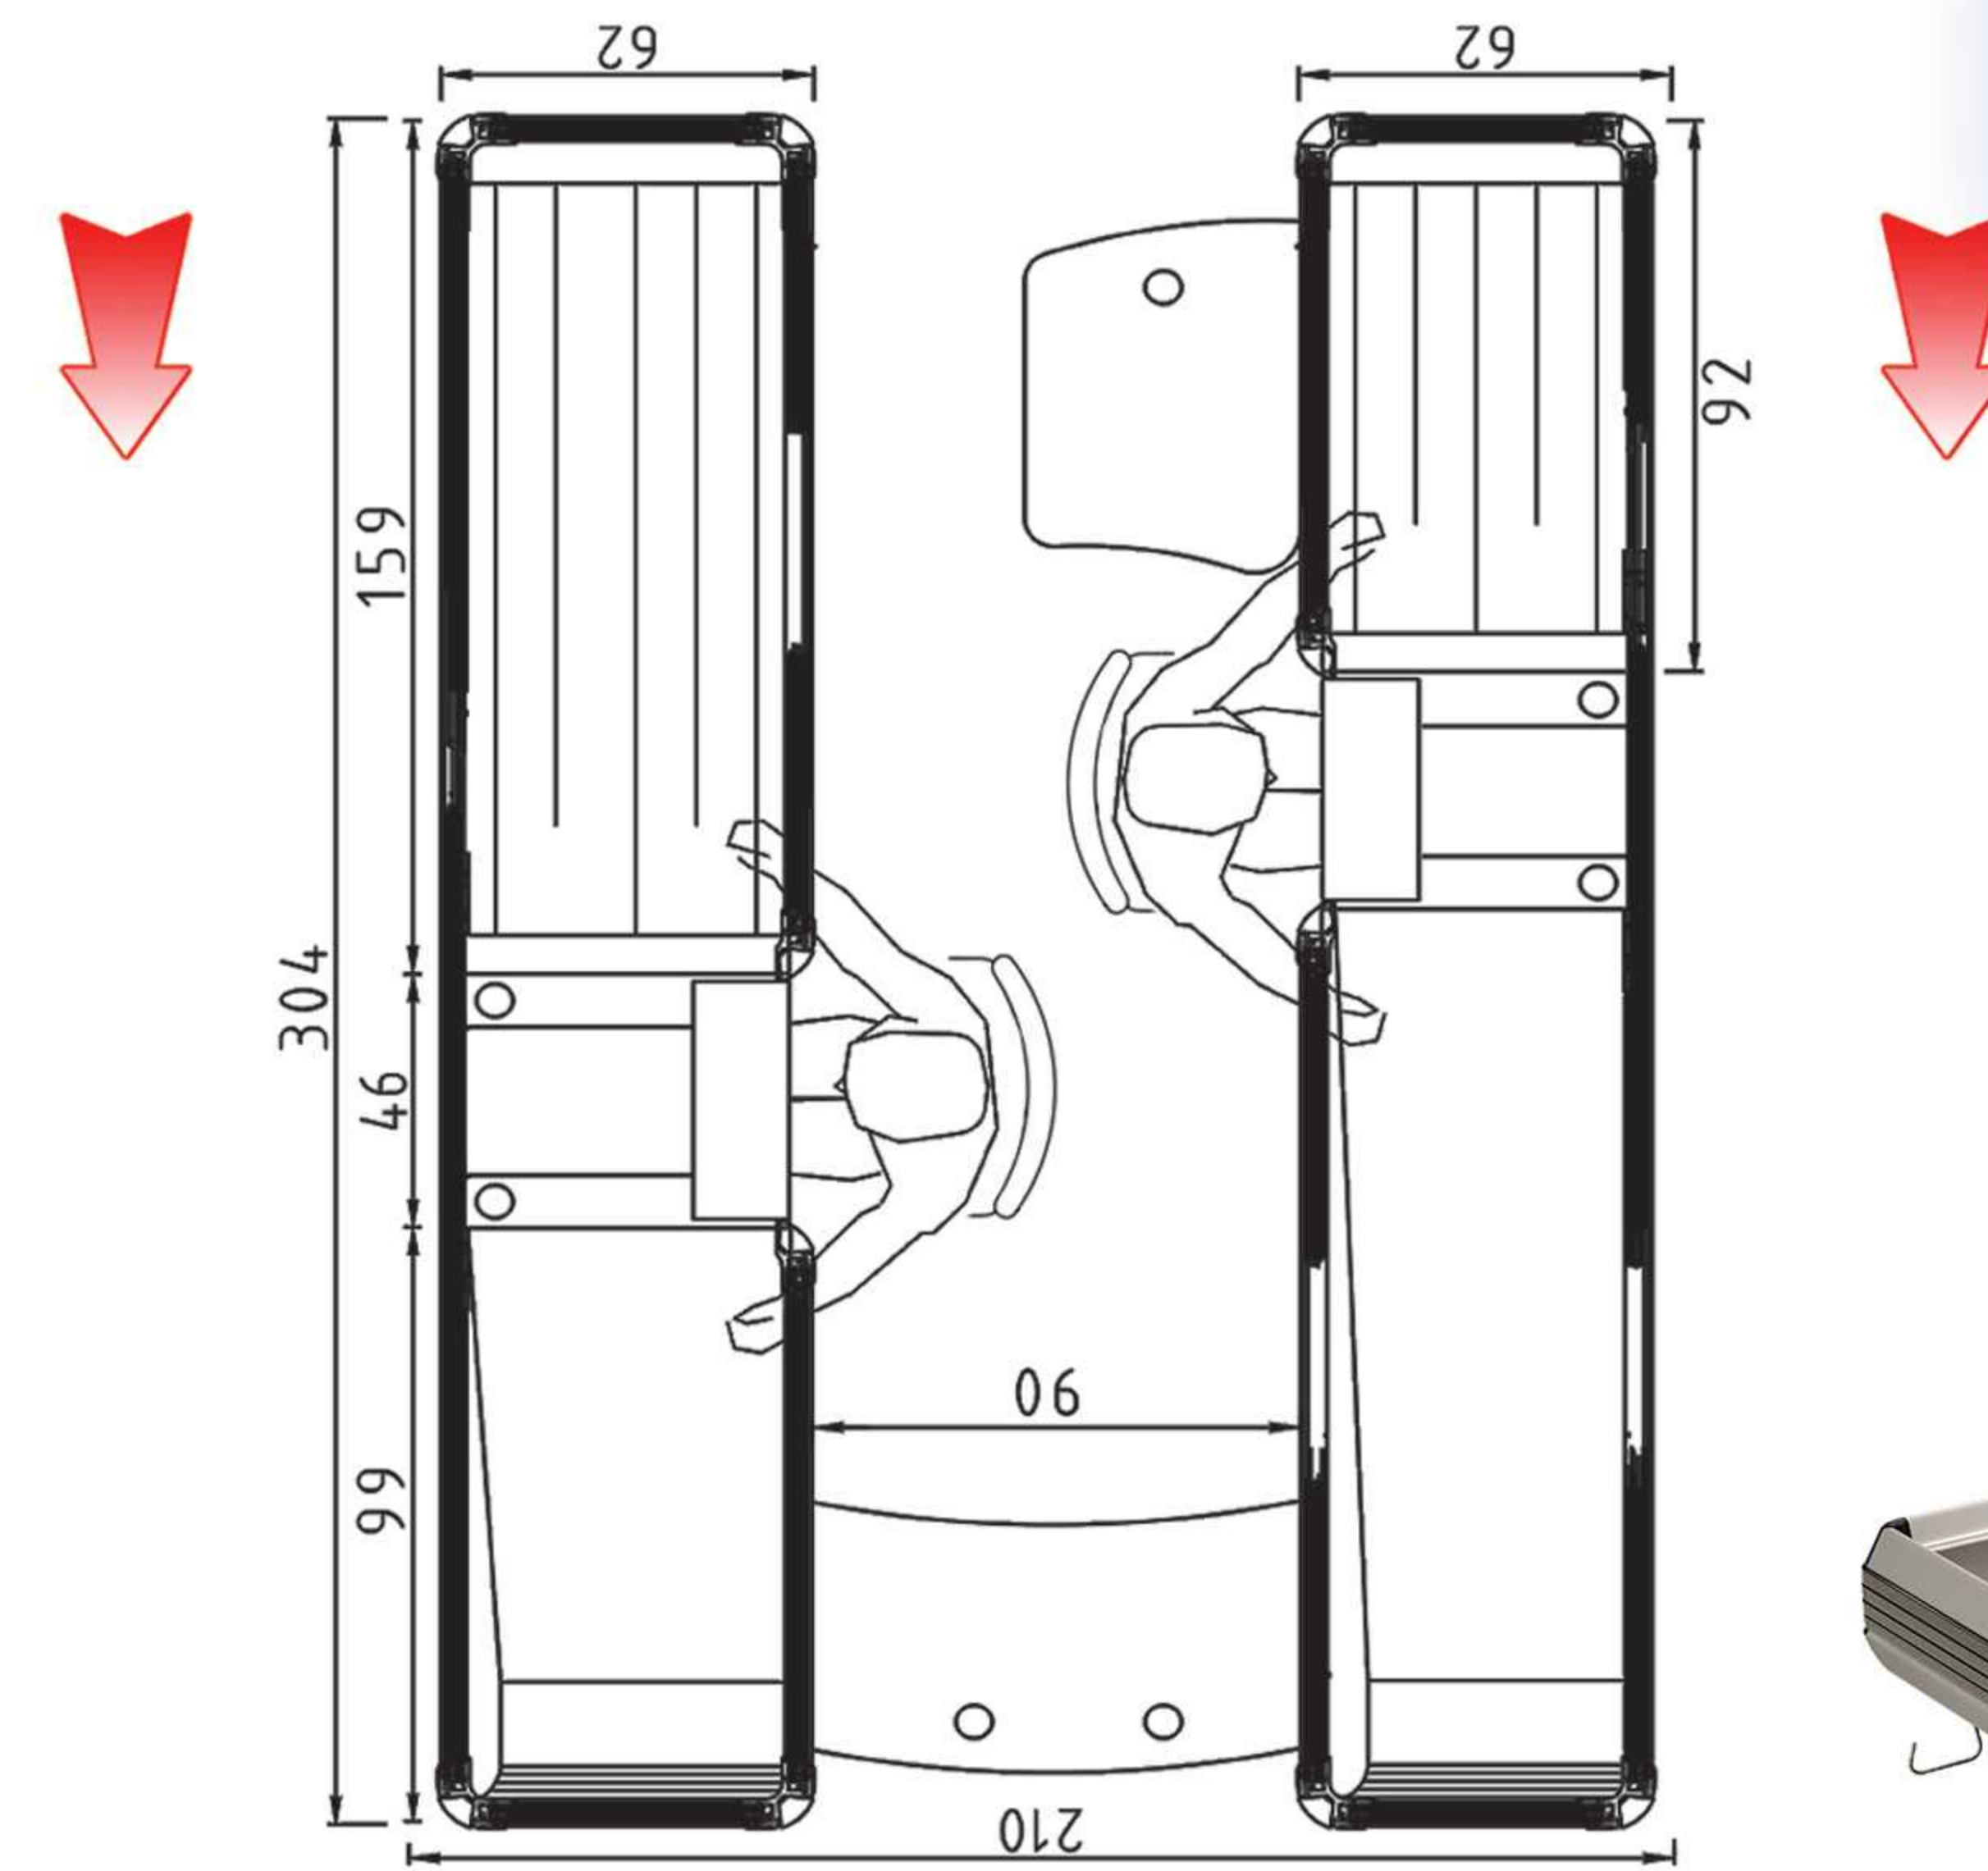

12 - Twin Check-out Counter Model H-series

- Include two I-series checkouts
- Back-Back User Working location
- Short lenght checkouts which provides more checkout front space

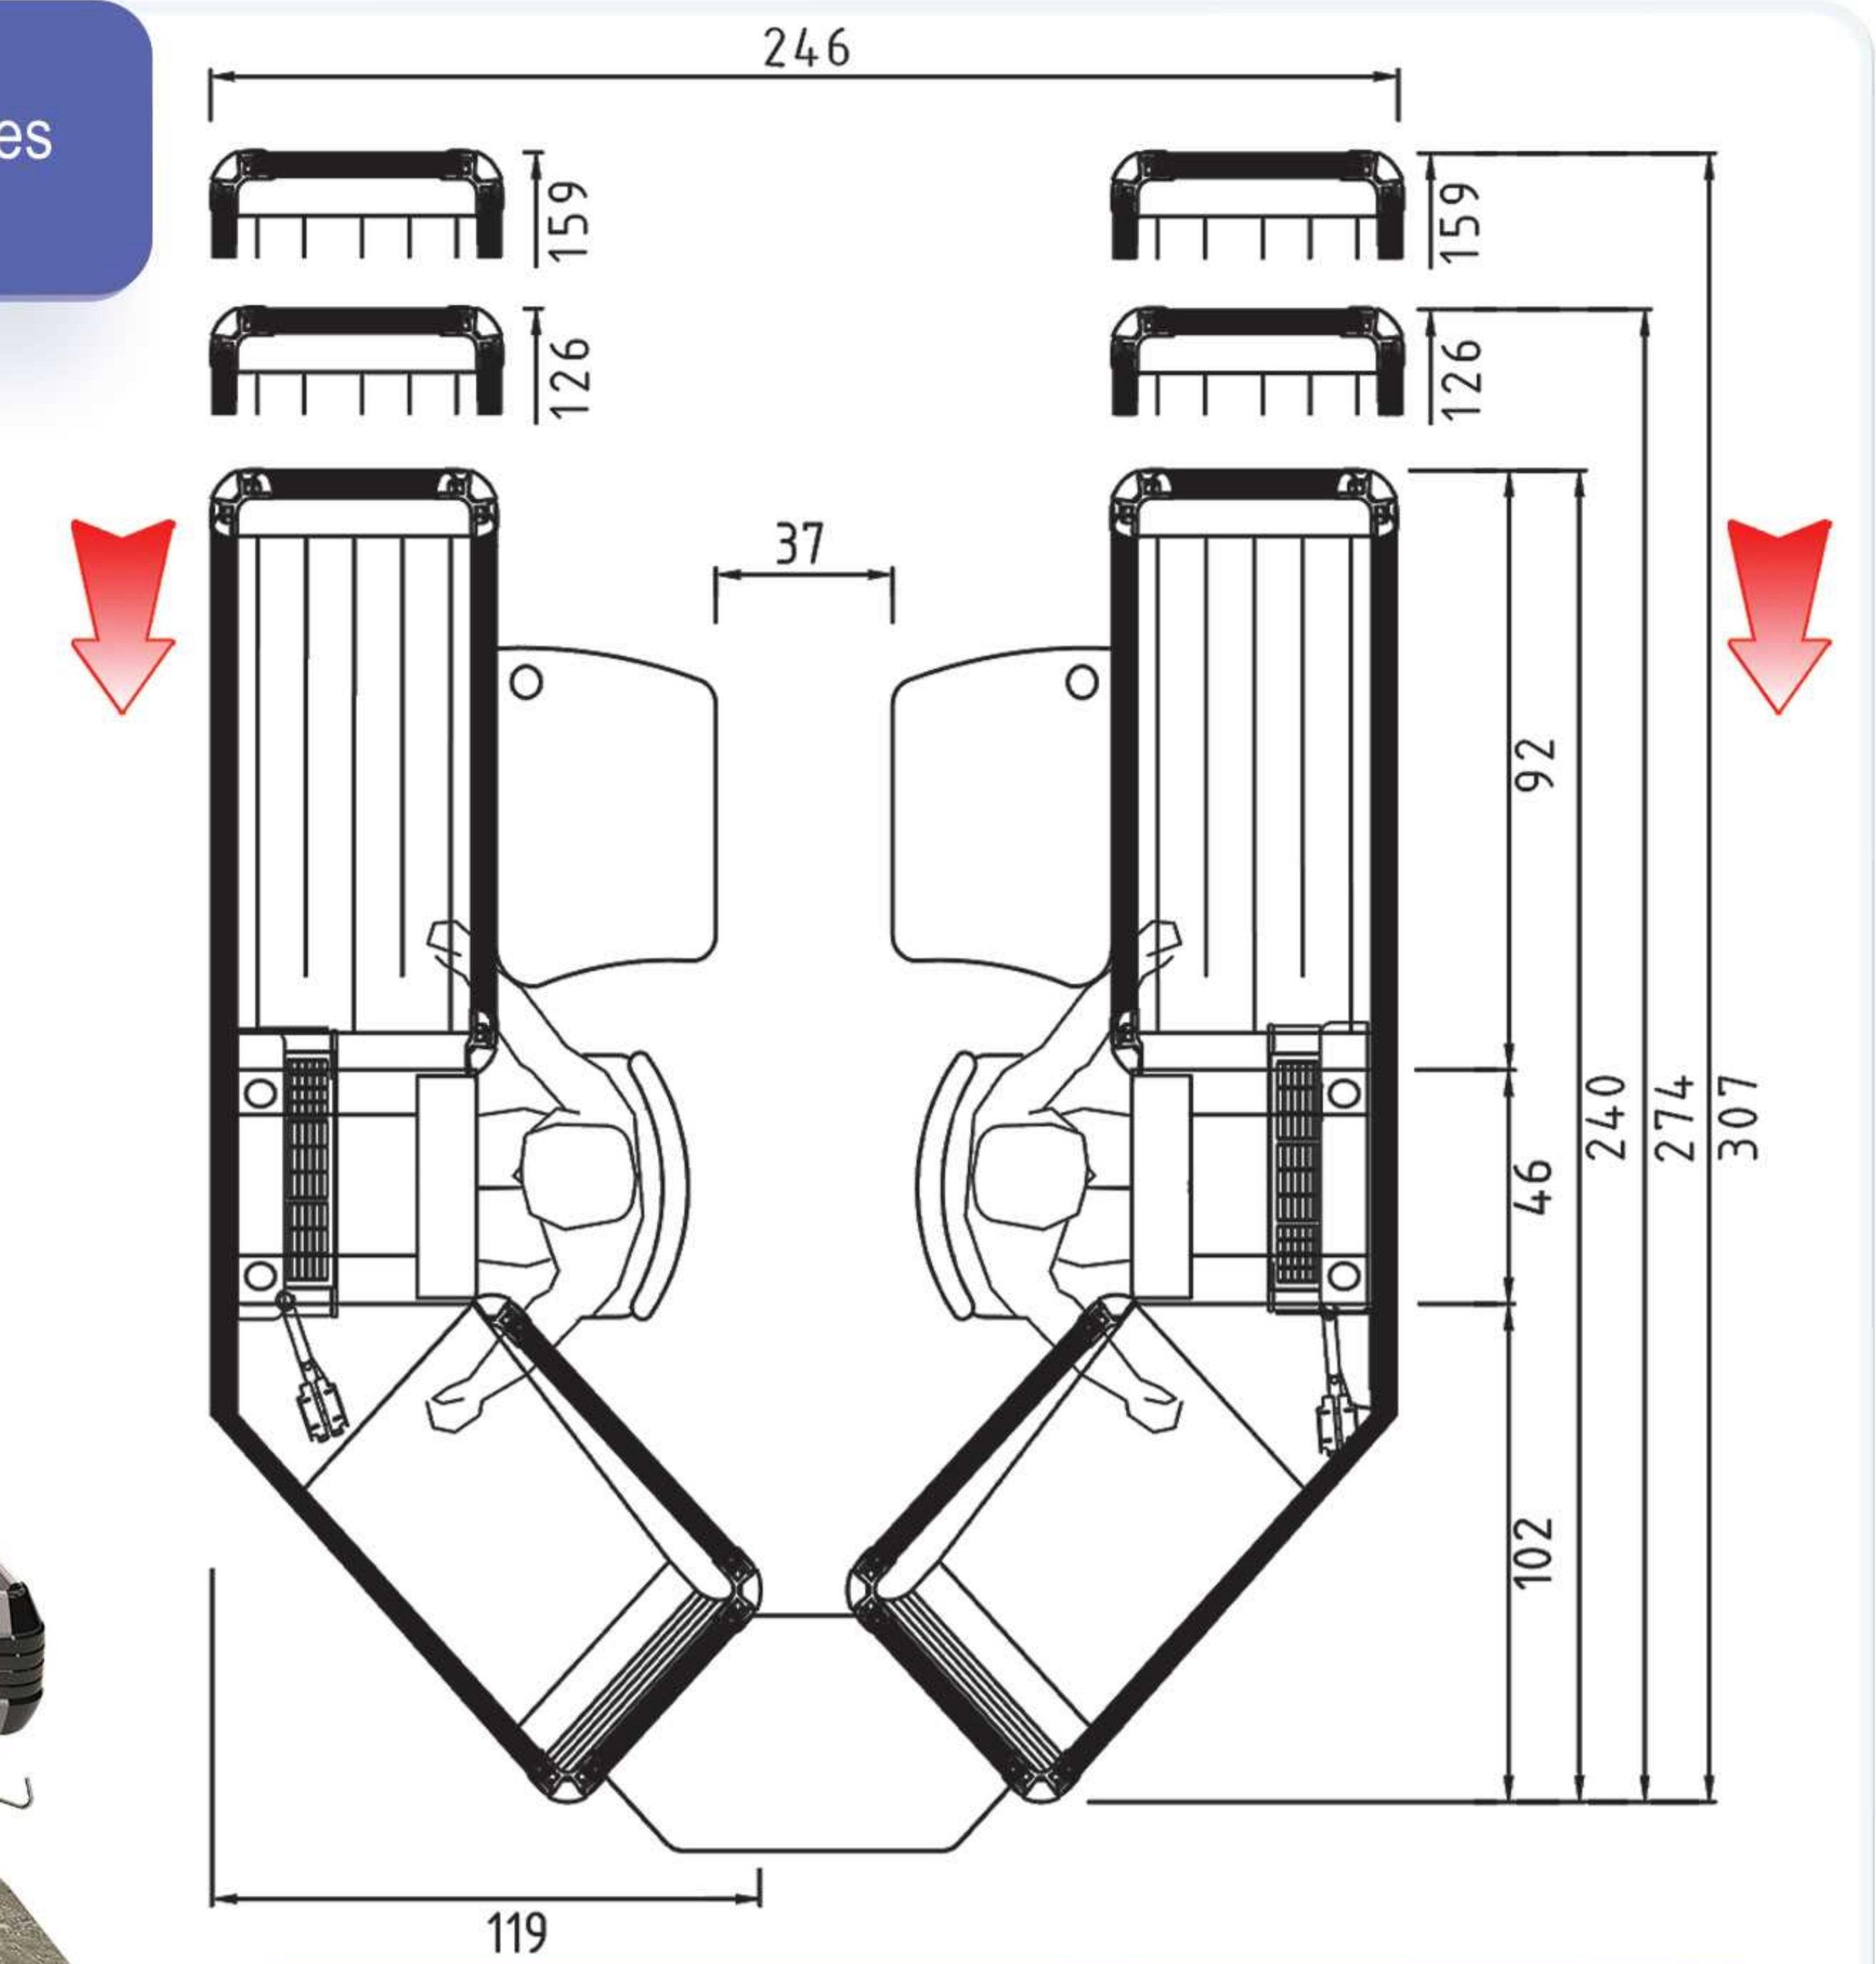

11- Twin Check-out Counter Model H-series

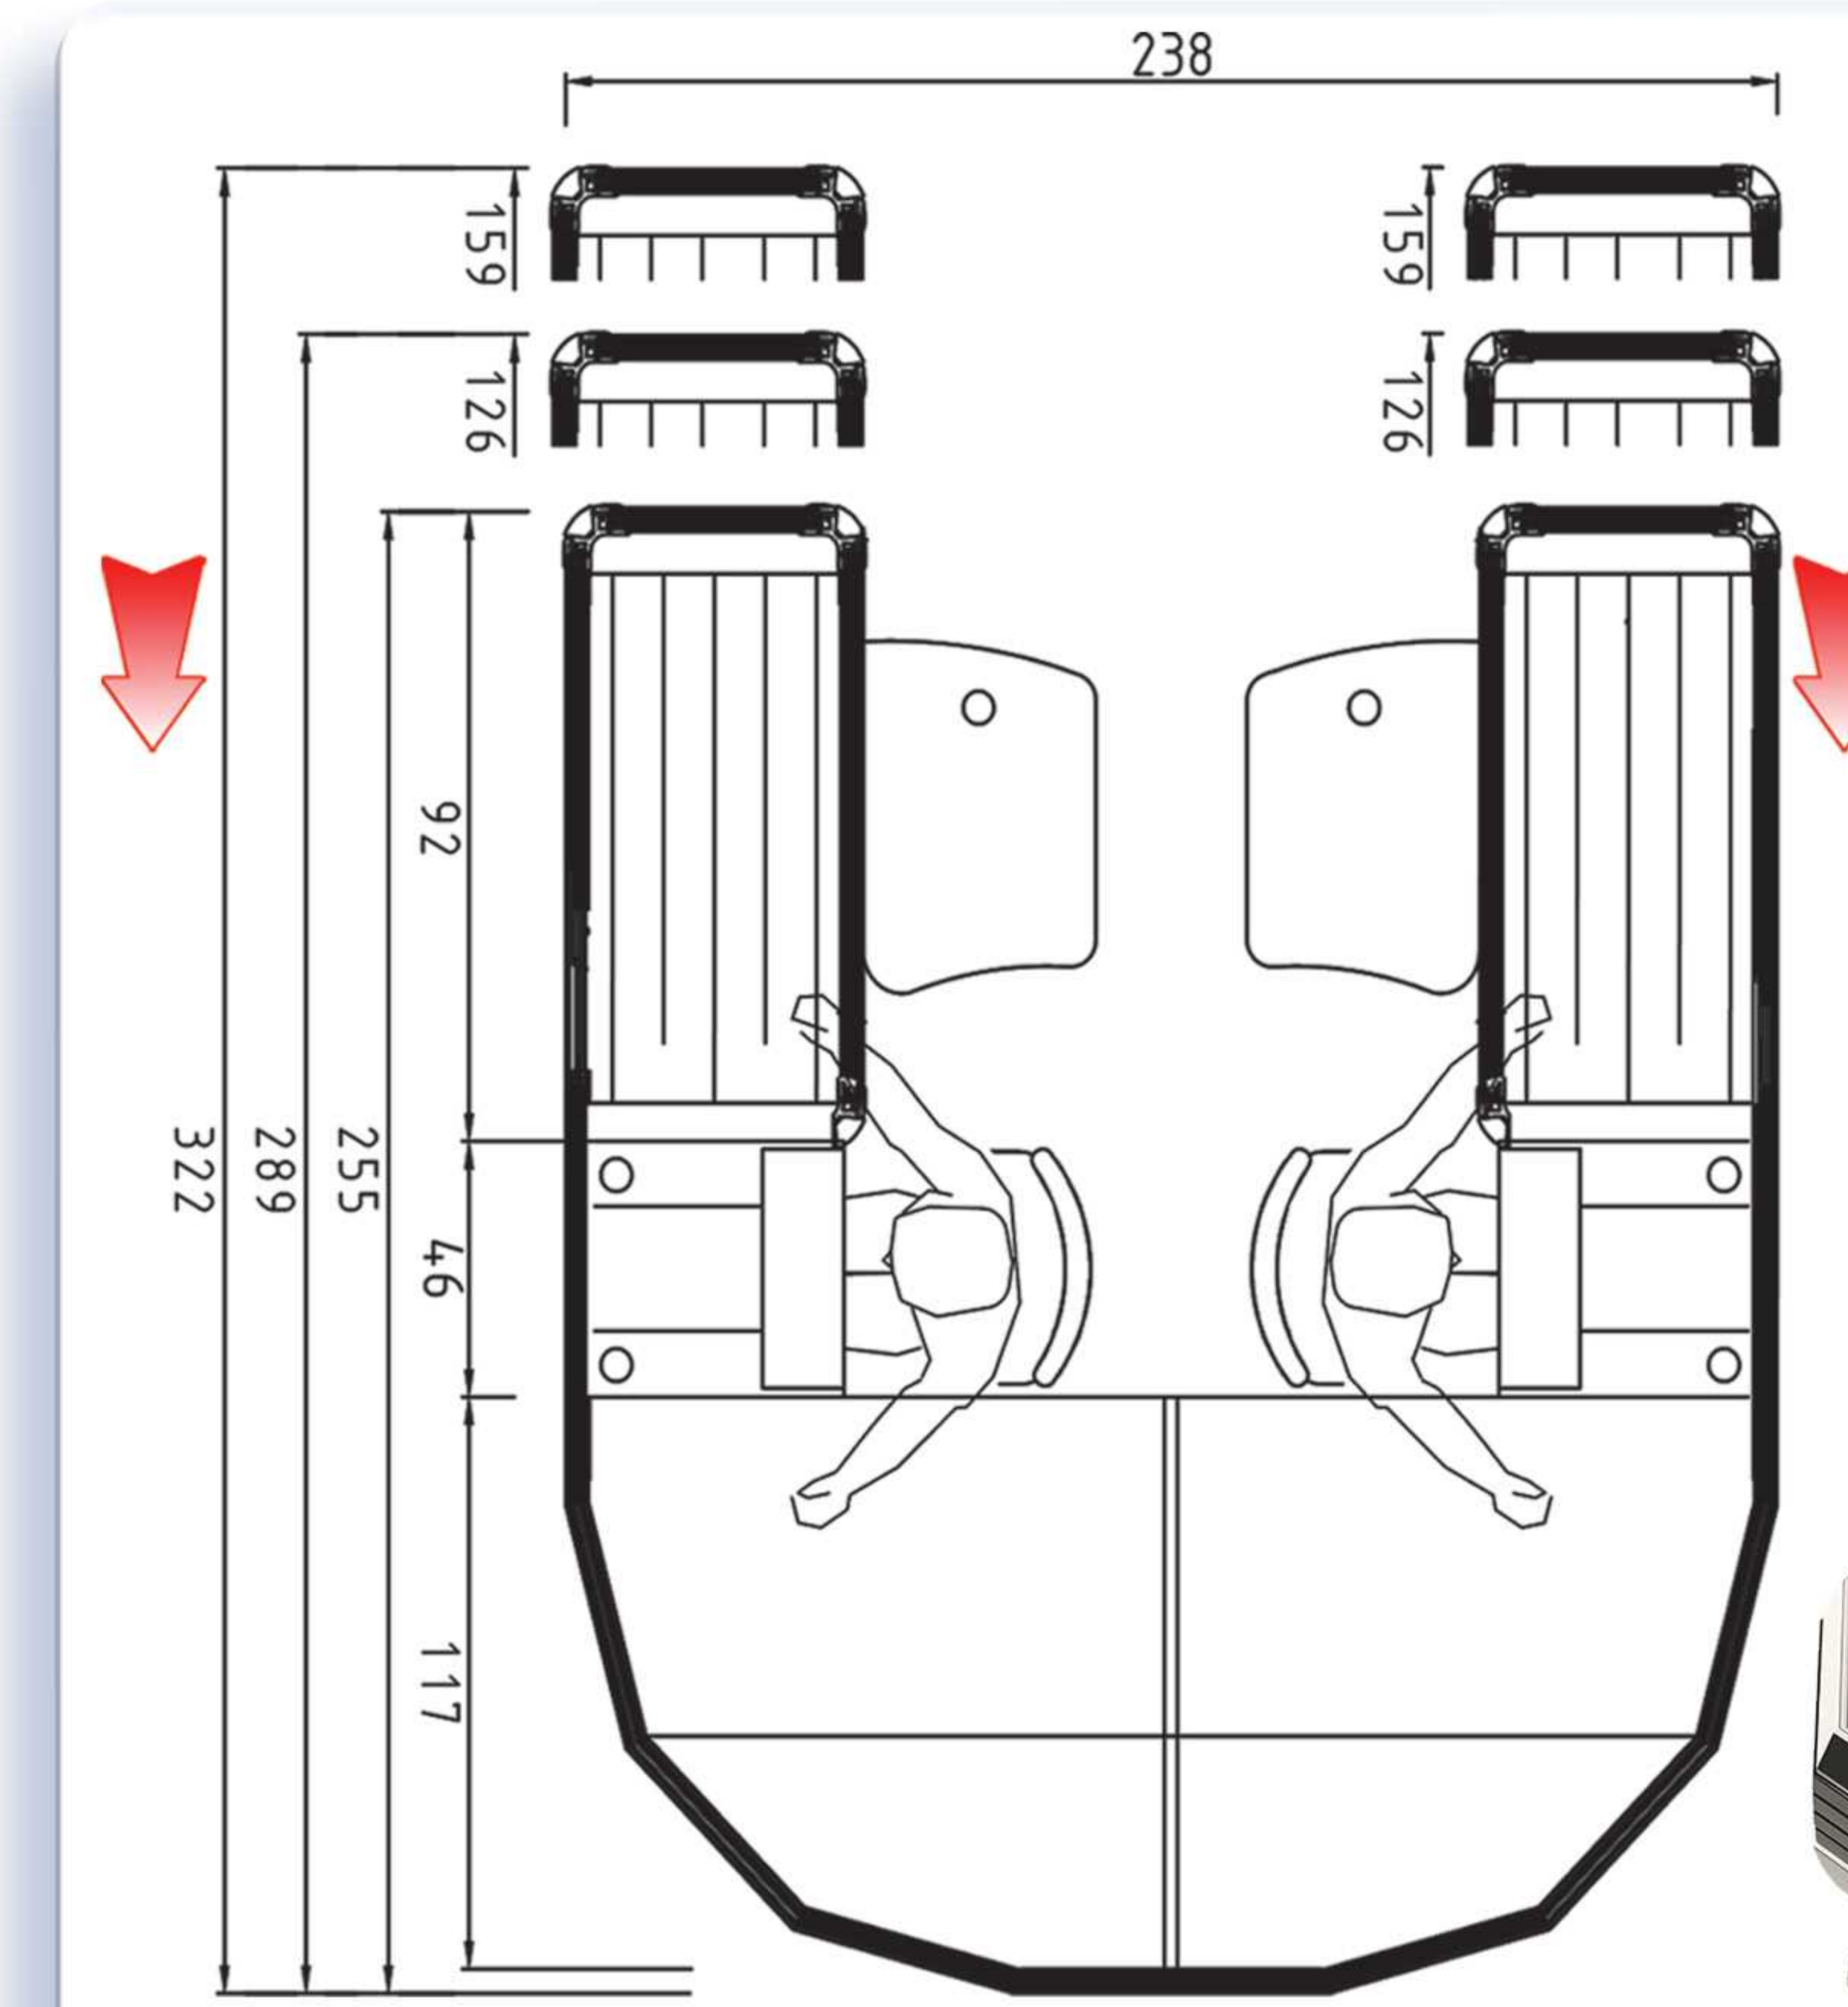

- Include a checkout with small conveyor, tall basin and Conversely the another.
- side-side User Working location
- Very Compact checkout with tighter Width which provides more options in Locating.

14- Twin Check-out Counter Model V-series

- In three different conveyor sizes according to Space and Goods Loading val.
- Back-Back User Working location
- Wider User Working Space
- Fluent customer passing because of its Curve design

- In three different conveyor sizes according to Space and Goods Loading val.
- Back-Back User Working location
- High Goods Loading Volume Basin

Check-out Counter Front Display

- Attractive design and Goods view
- Very comfortable transporting
- In two different length & design

Check-out counter Side Display

- It's fixed to the checkout and have user passing free space
- Also it has very effective Goods View

SELF-CHECKOUT

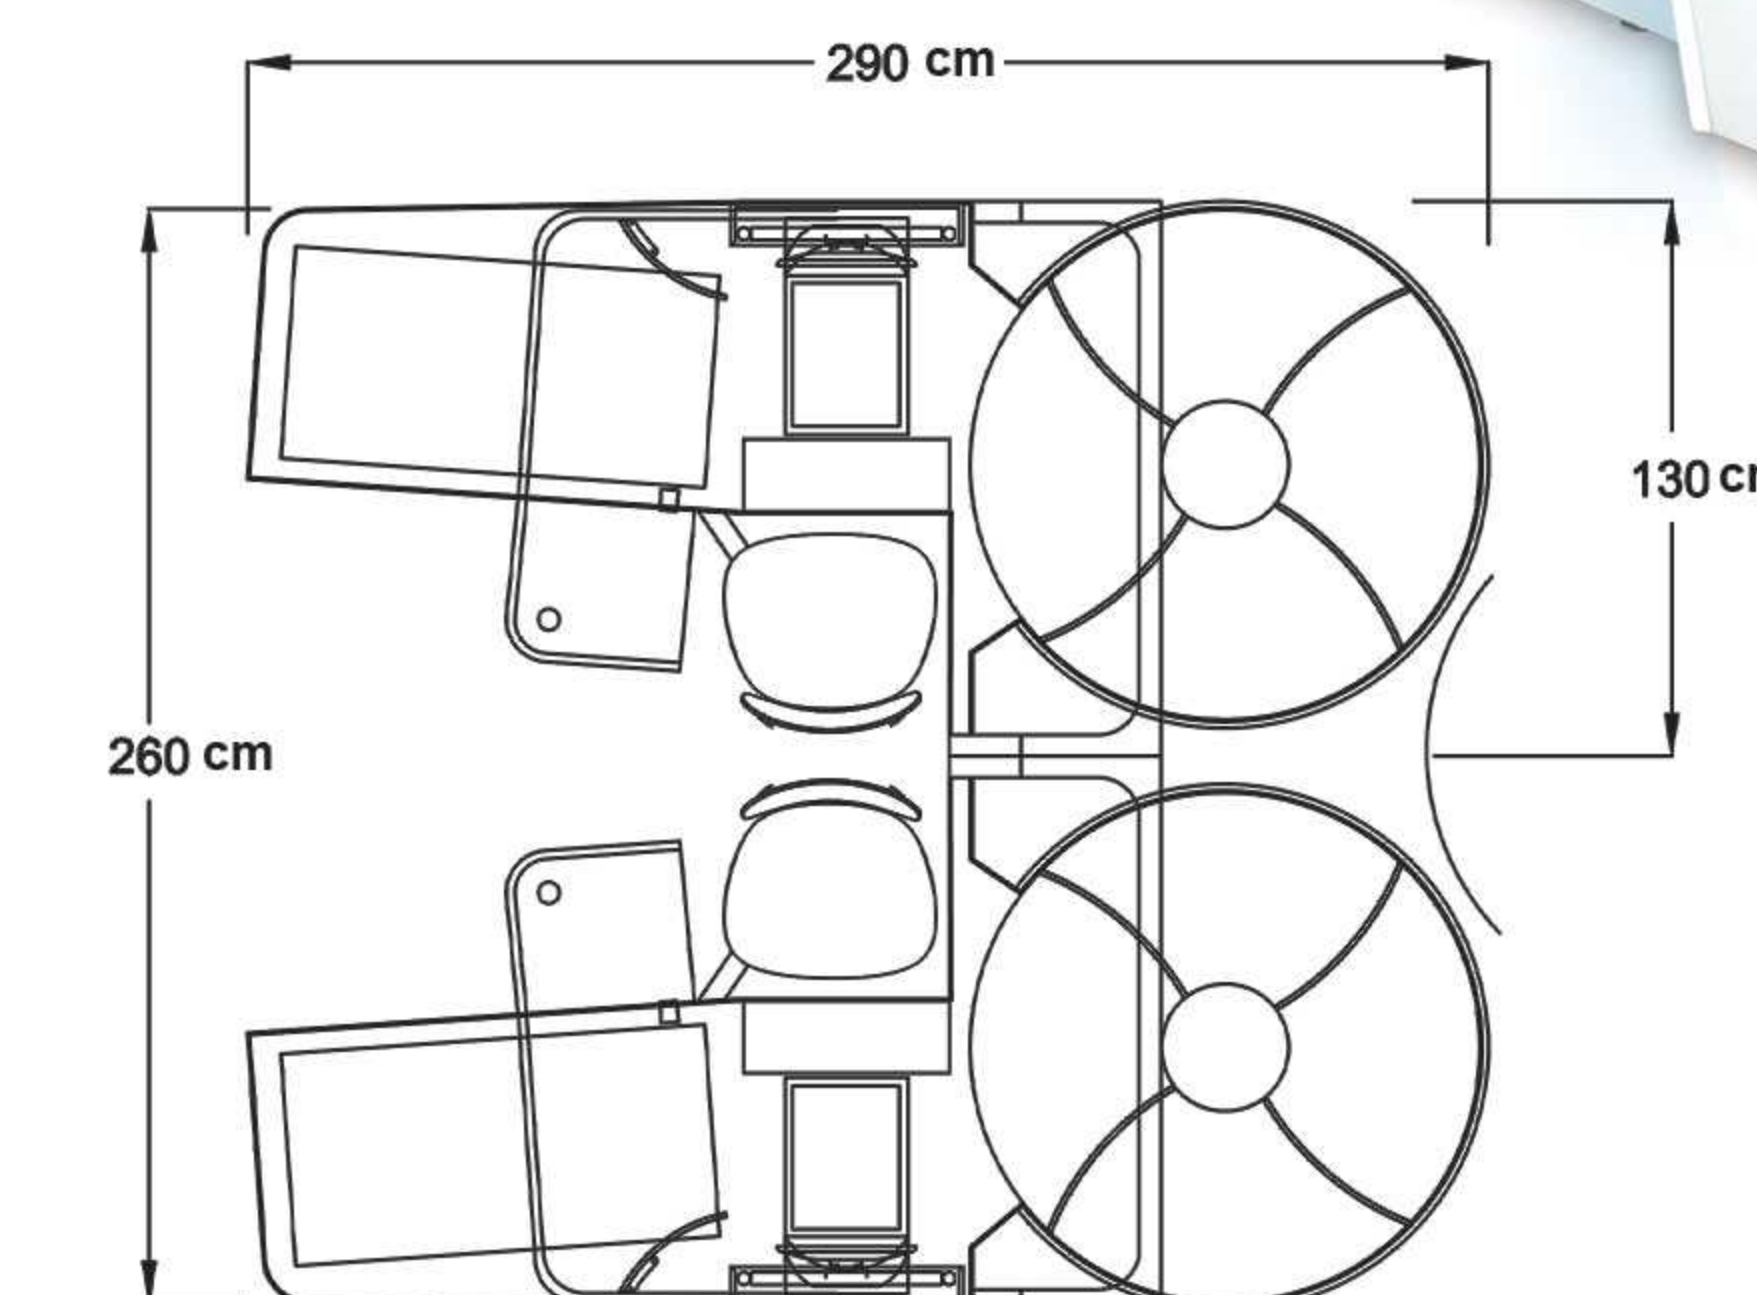

In self-checkout systems, the customer is required to scan the barcodes themselves; input the types of items such as fruit and vegetable (usually with a touchscreen display); weigh them, if applicable; and place all scanned items into a "bagging area". The weight observed in the bagging area is verified against previously stored information to ensure that the correct item is bagged, allowing the customer to proceed only if the observed and expected weights match.

Payment by various methods may be accepted by the machines: card via EFTPOS, debit-credit cards, electronic food assistance cards, cash via coin slot and bank note scanner, and in-store gift cards where applicable. Most coupons also have barcodes and can be scanned the same way that items are scanned, although some require entry by a member of staff.

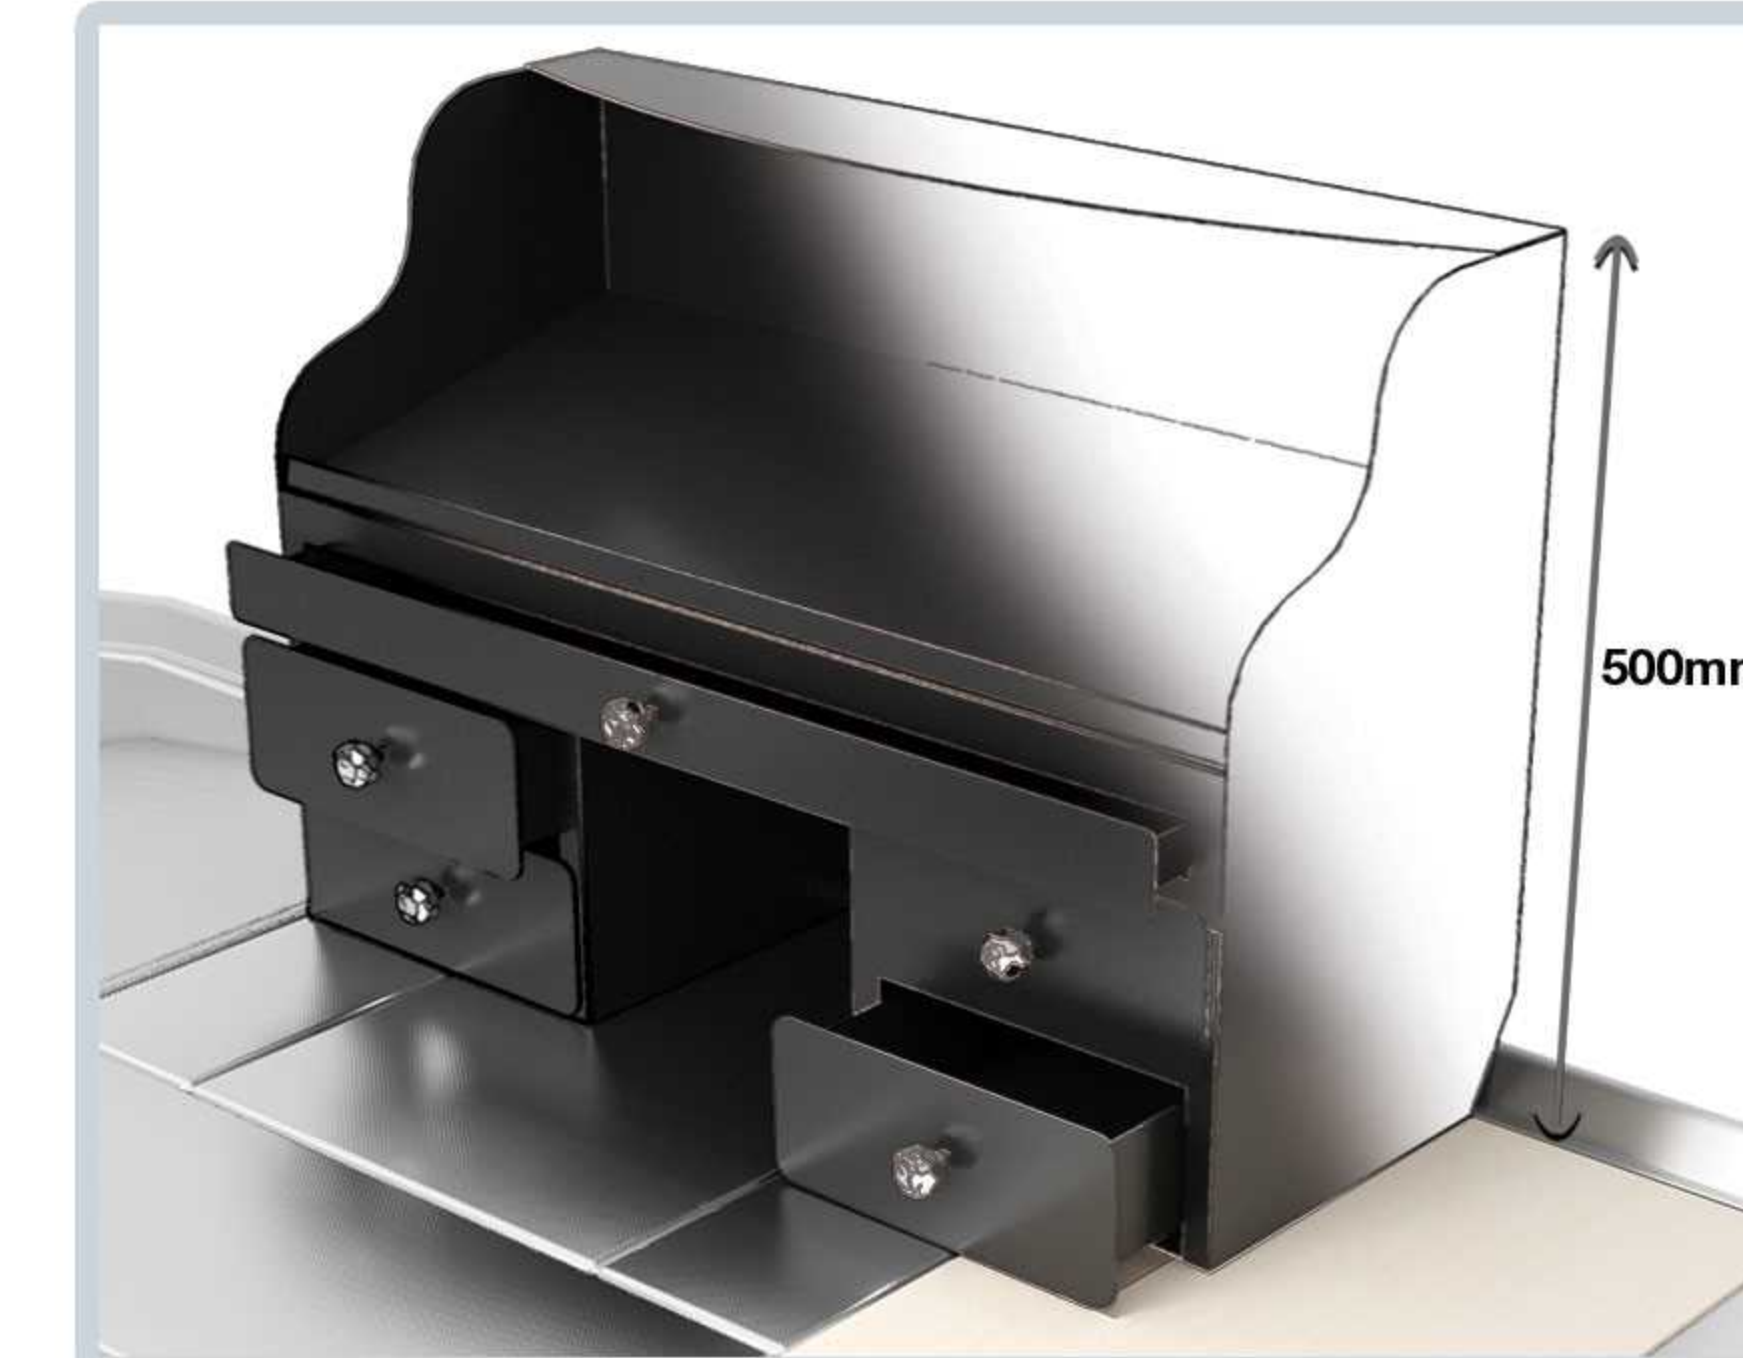

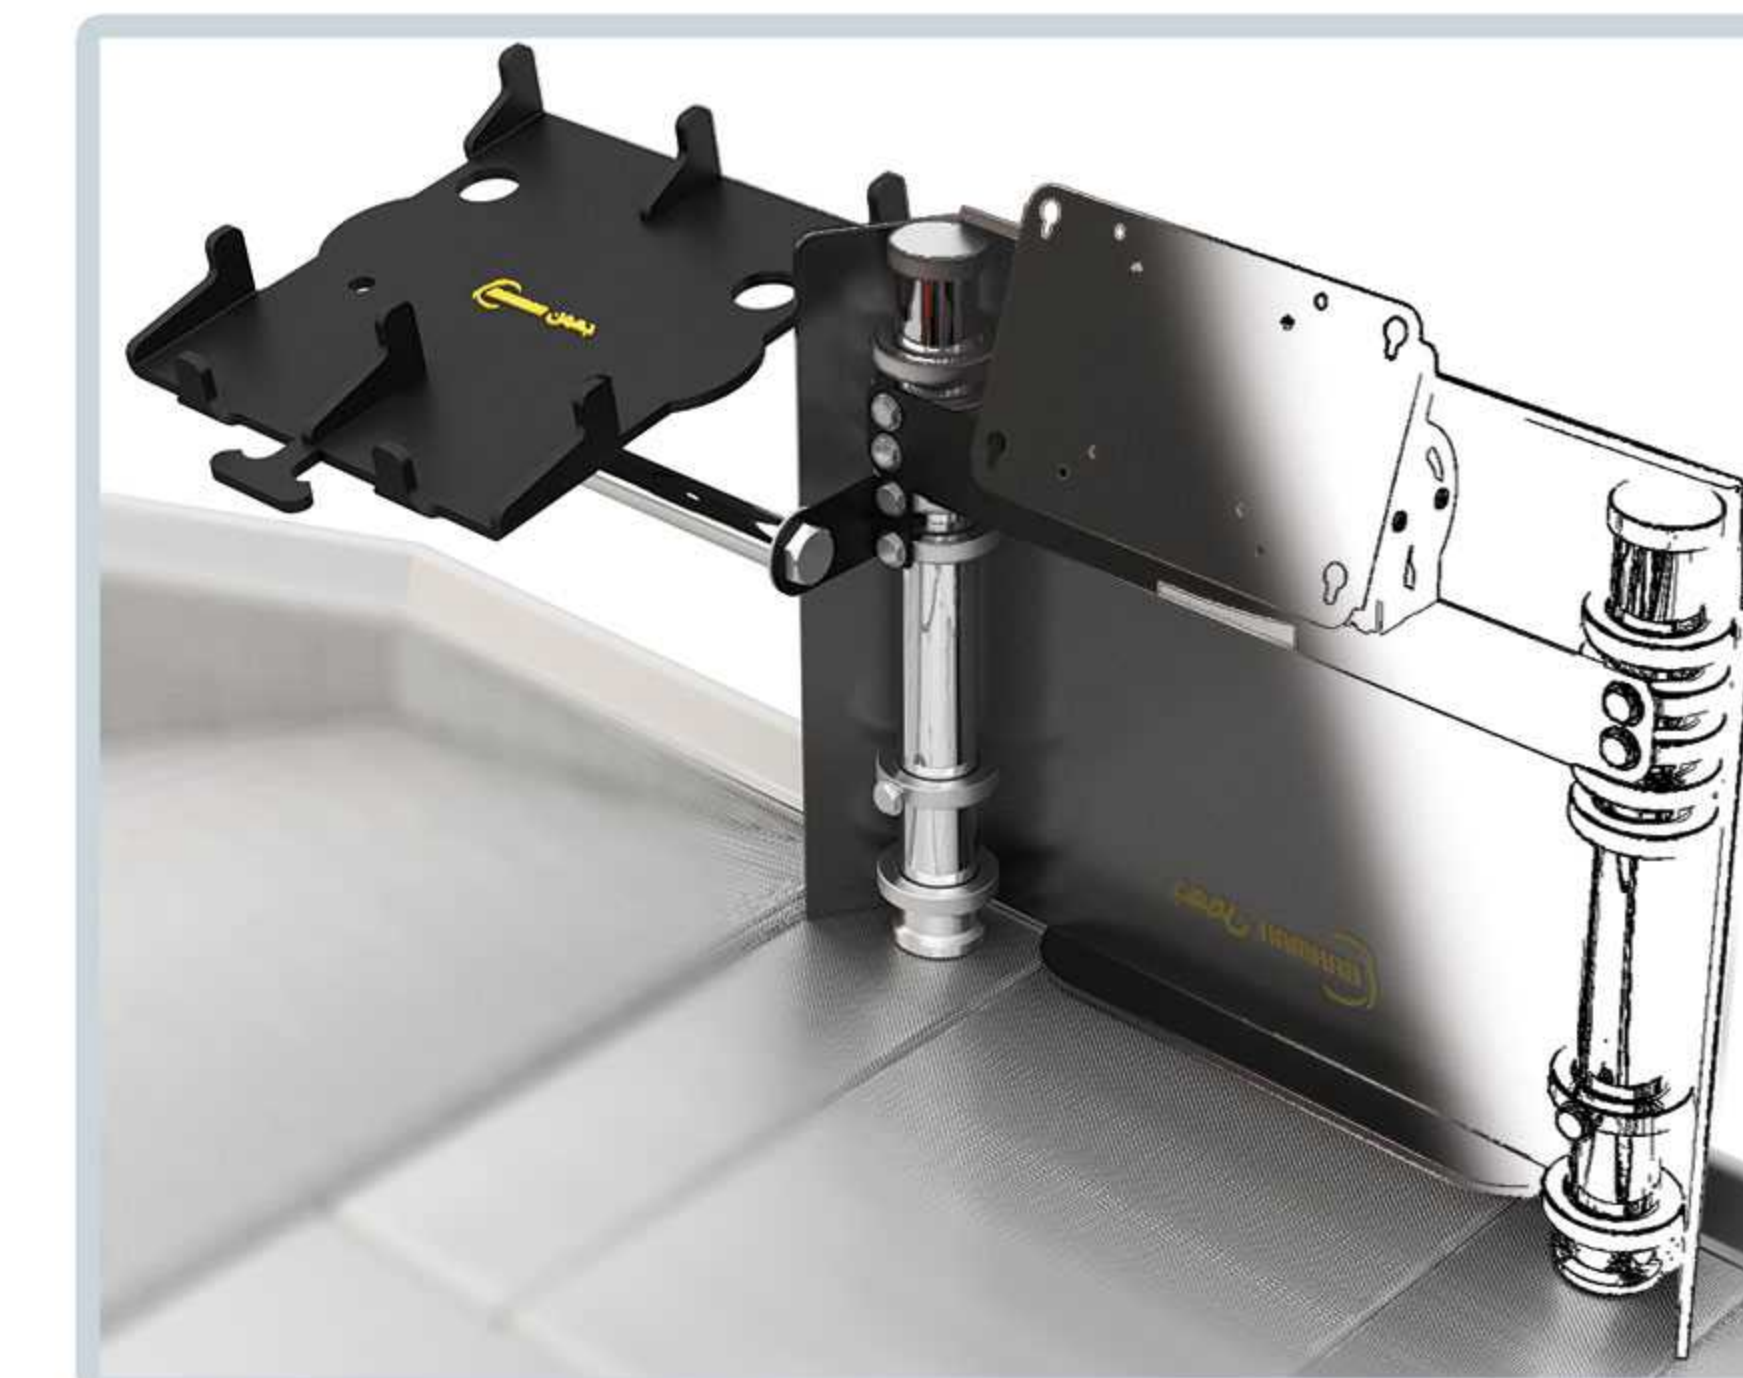

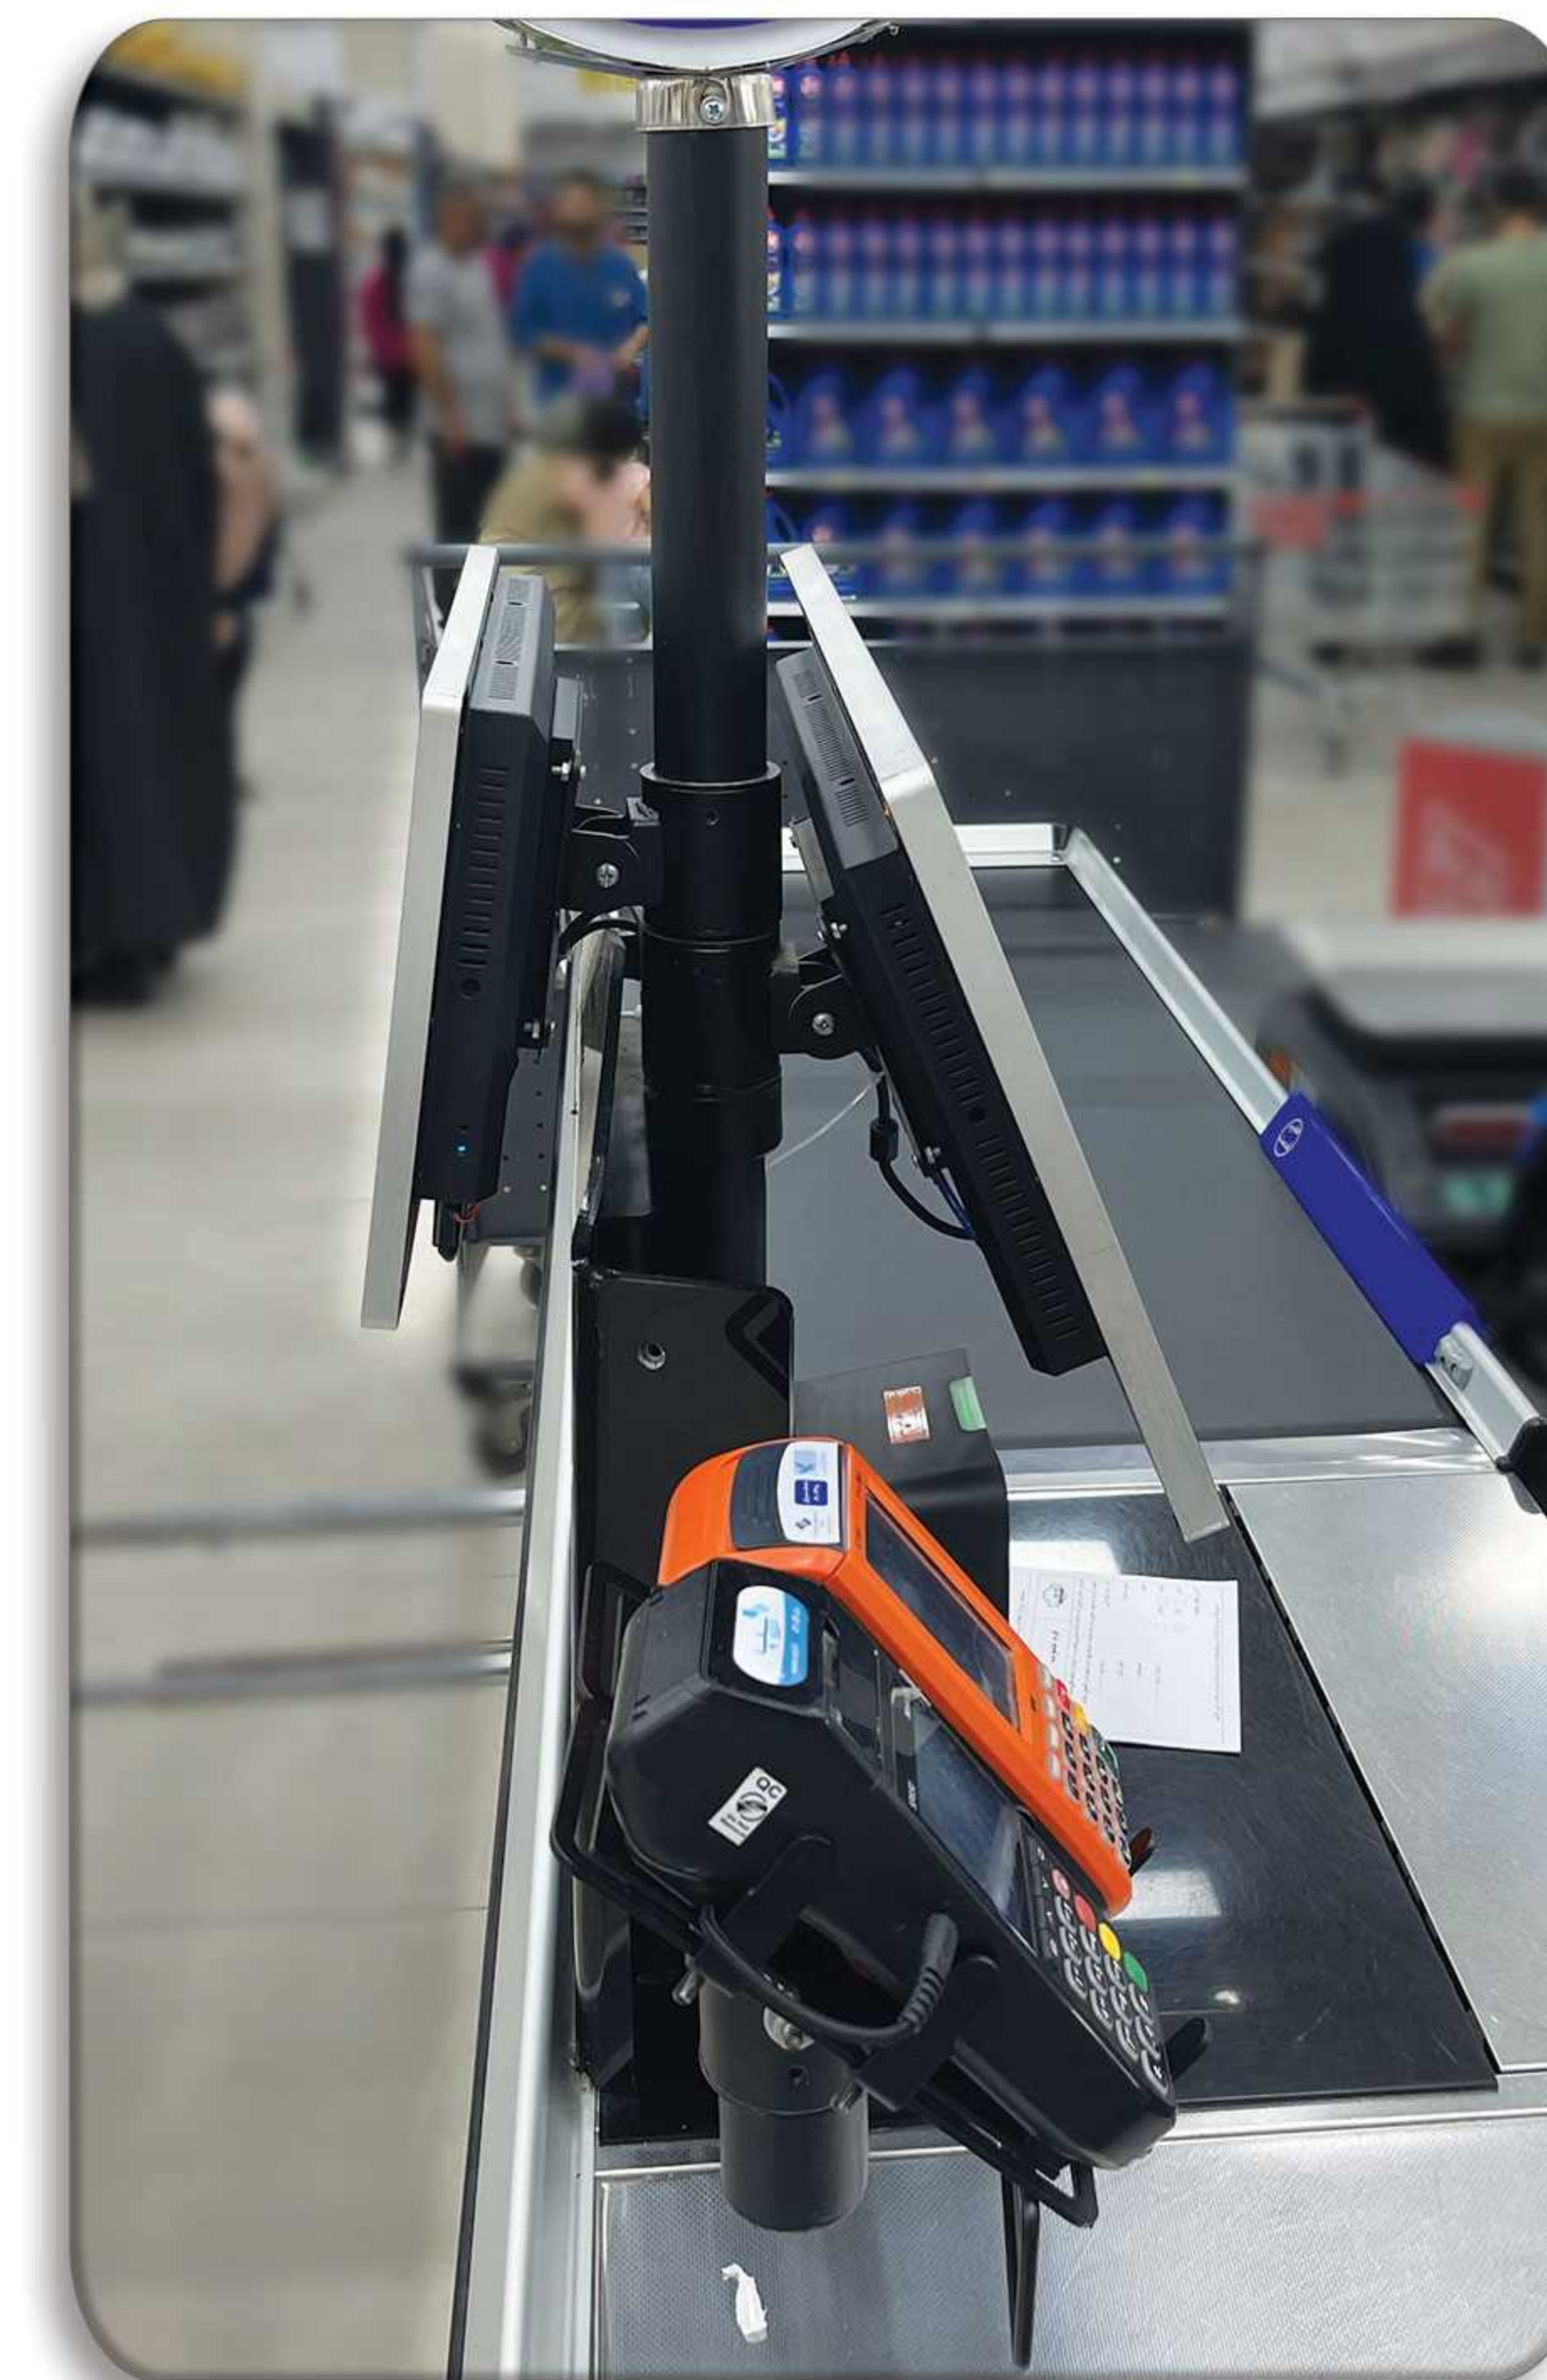

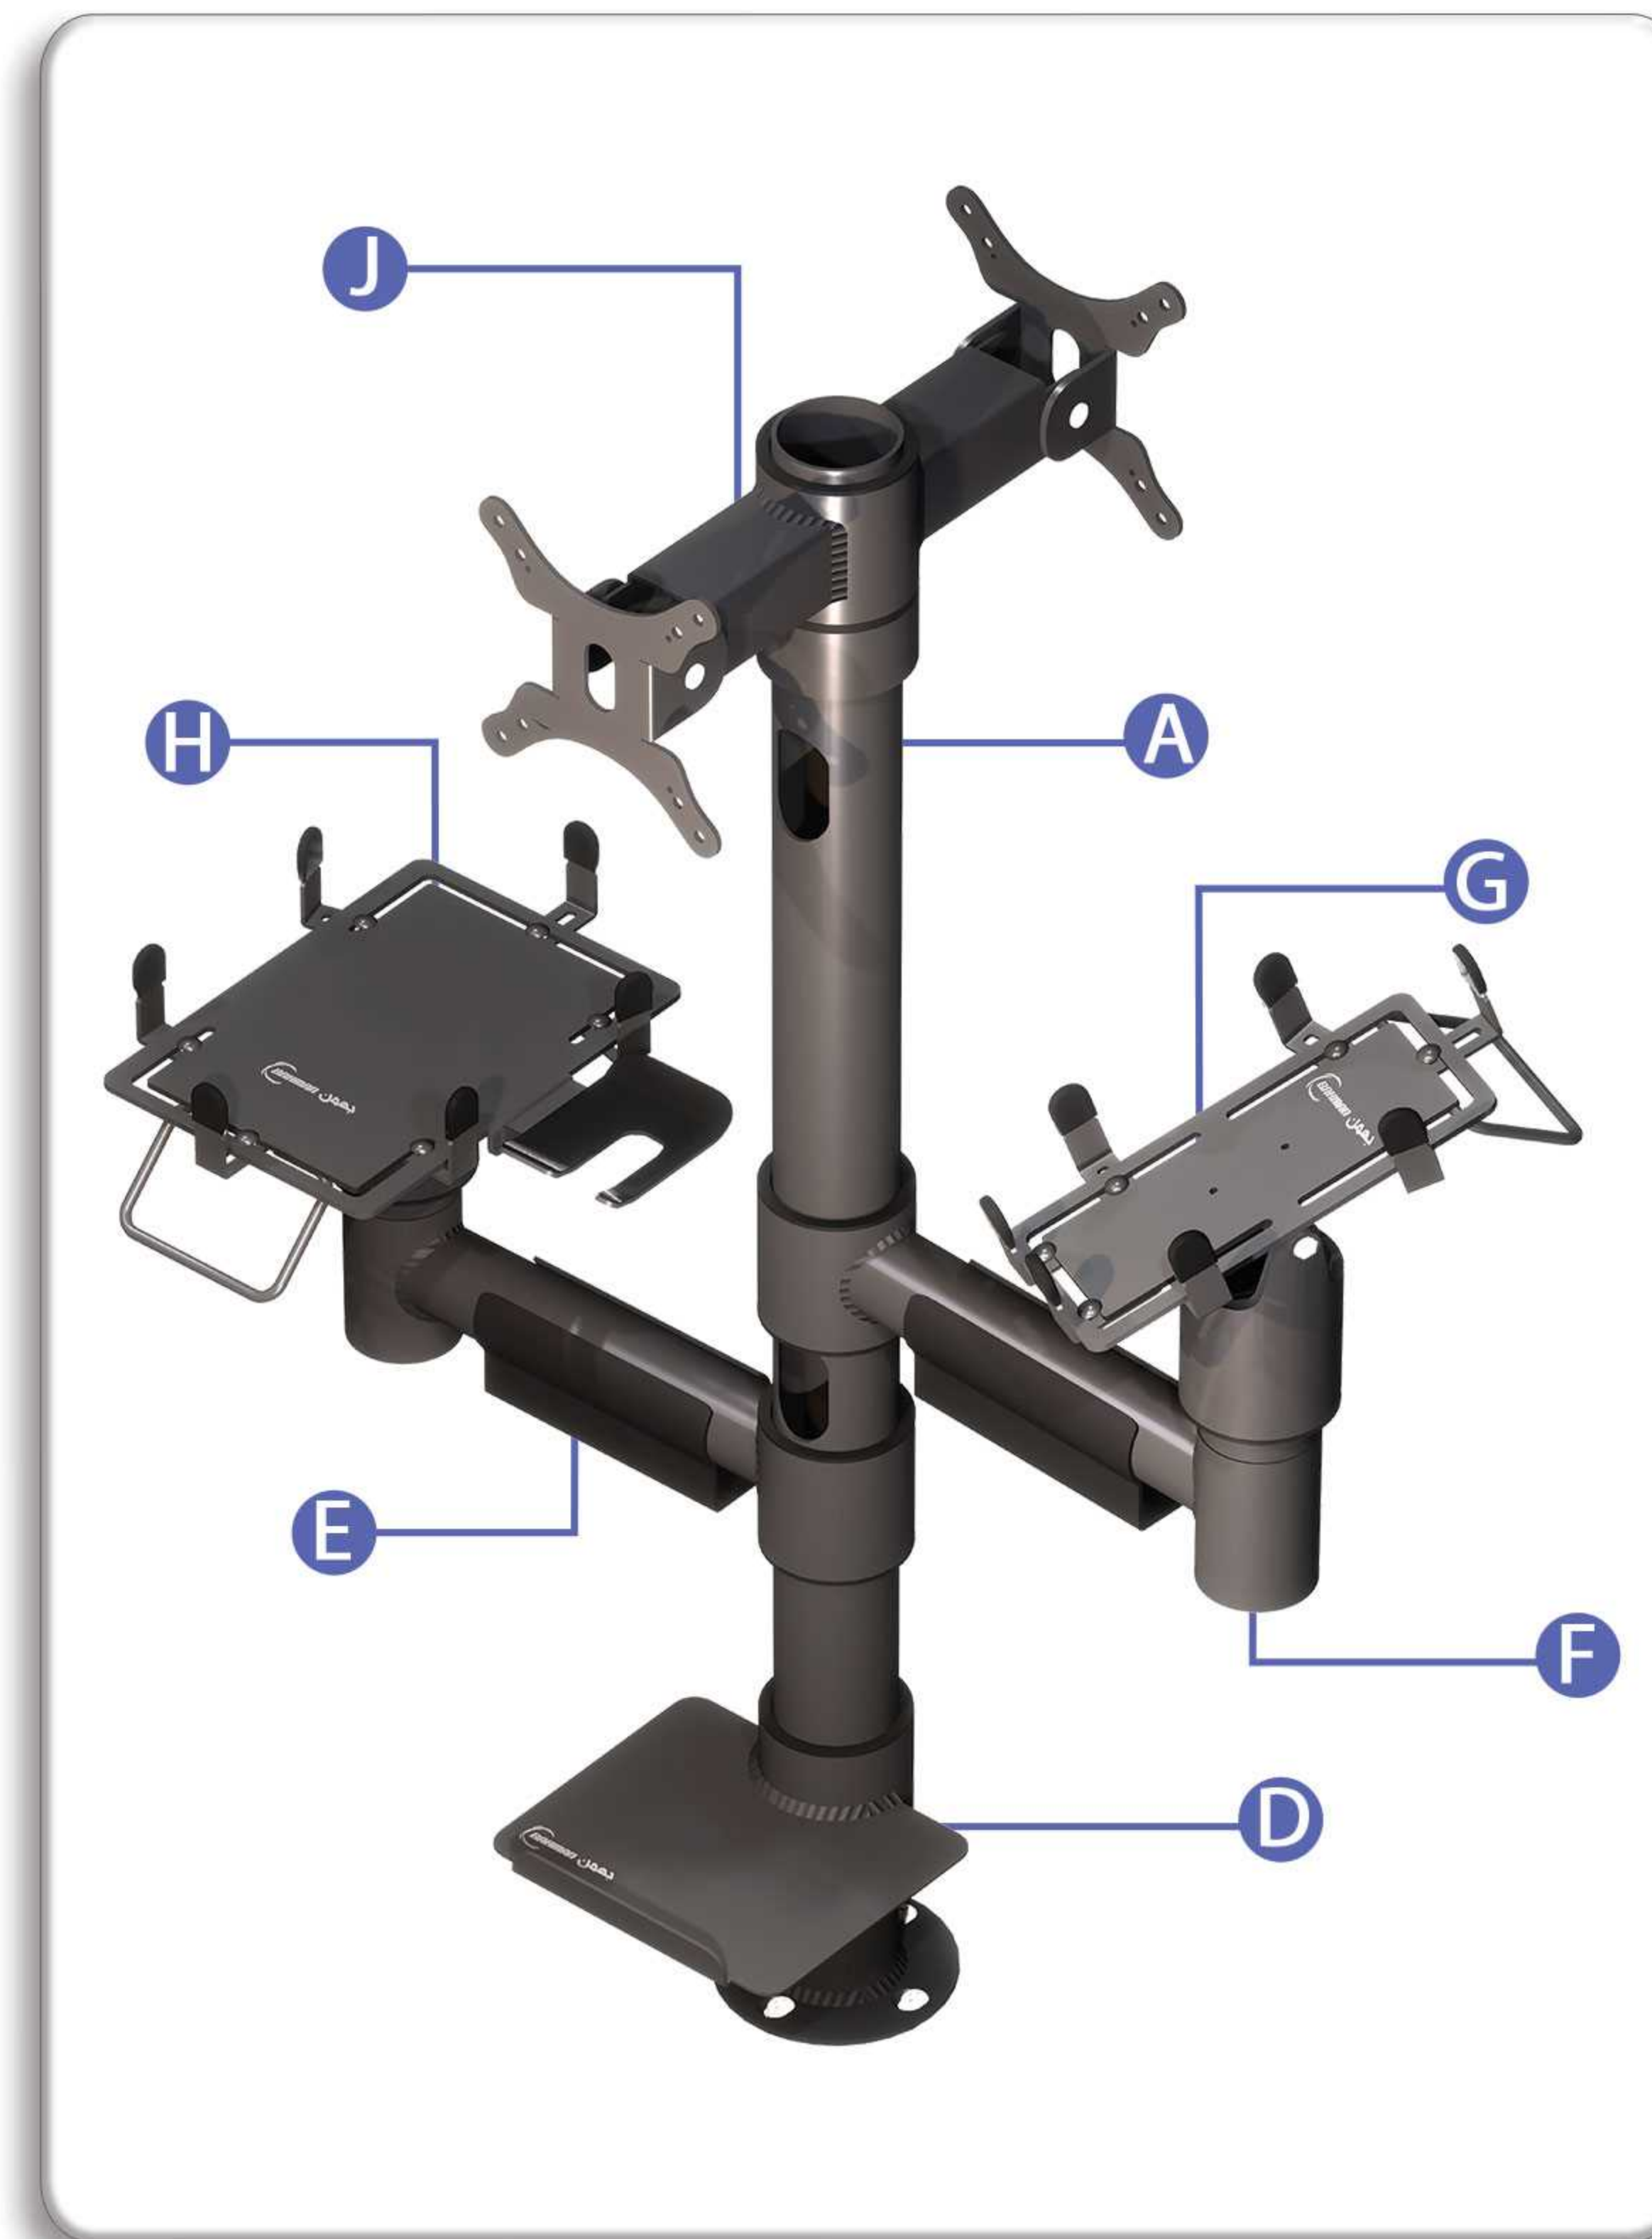

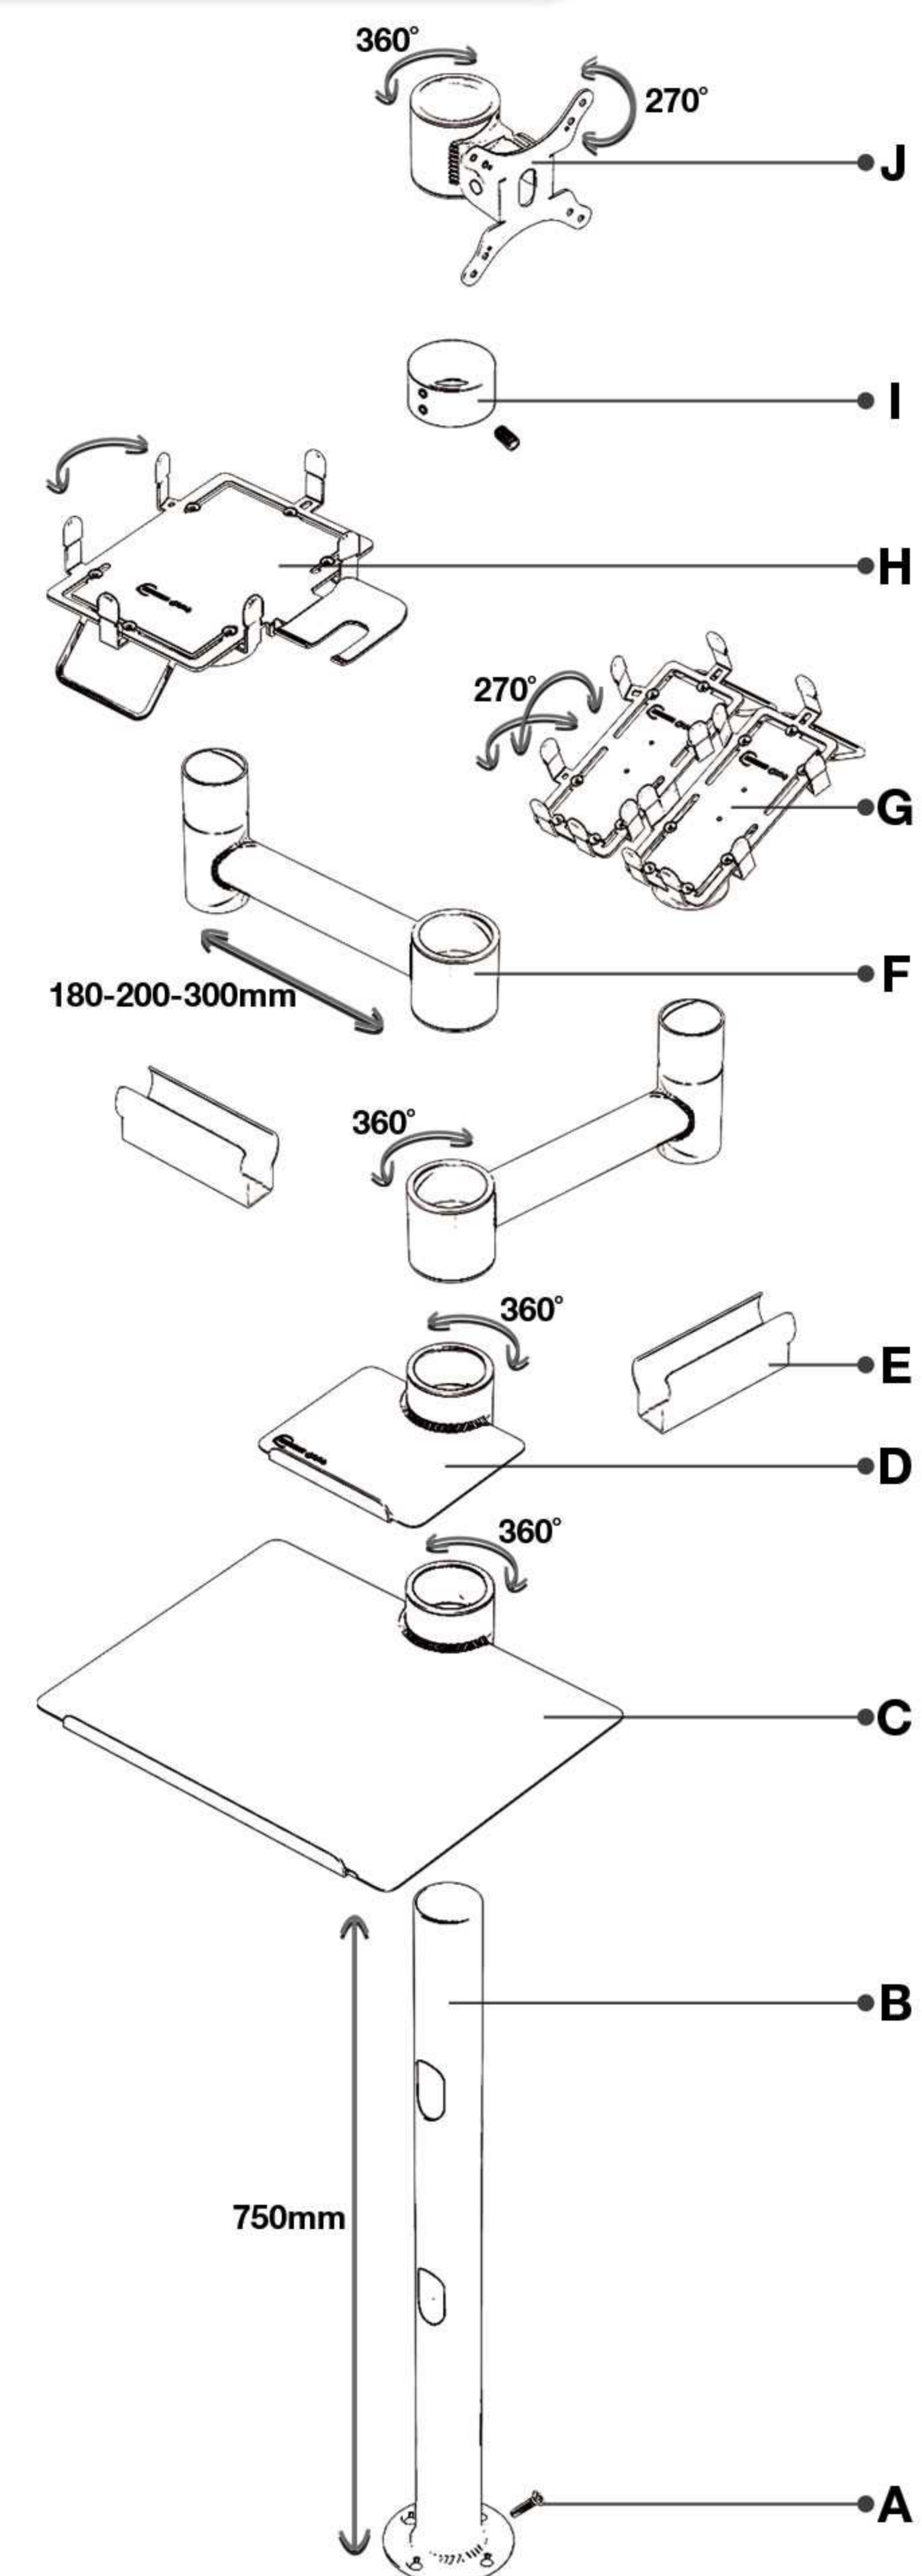

Self-checkout can also sometimes be faster than using a cashier lane. This can reduce the length of checkout lines and wait times.[5] In a survey by NCR, 42% of customers said they like the convenience of self-checkout, while 39% said it was faster than the cashier-assisted line. 90% of those surveyed responded as being users of self-checkout, with 7% of respondents saying they will always use self-checkout regardless of store lines and number of items. Survey respondents in Italy and Australia stated they "always use self-checkout" at a rate of 13% and 9% respectively.

TORBO CHECKOUT

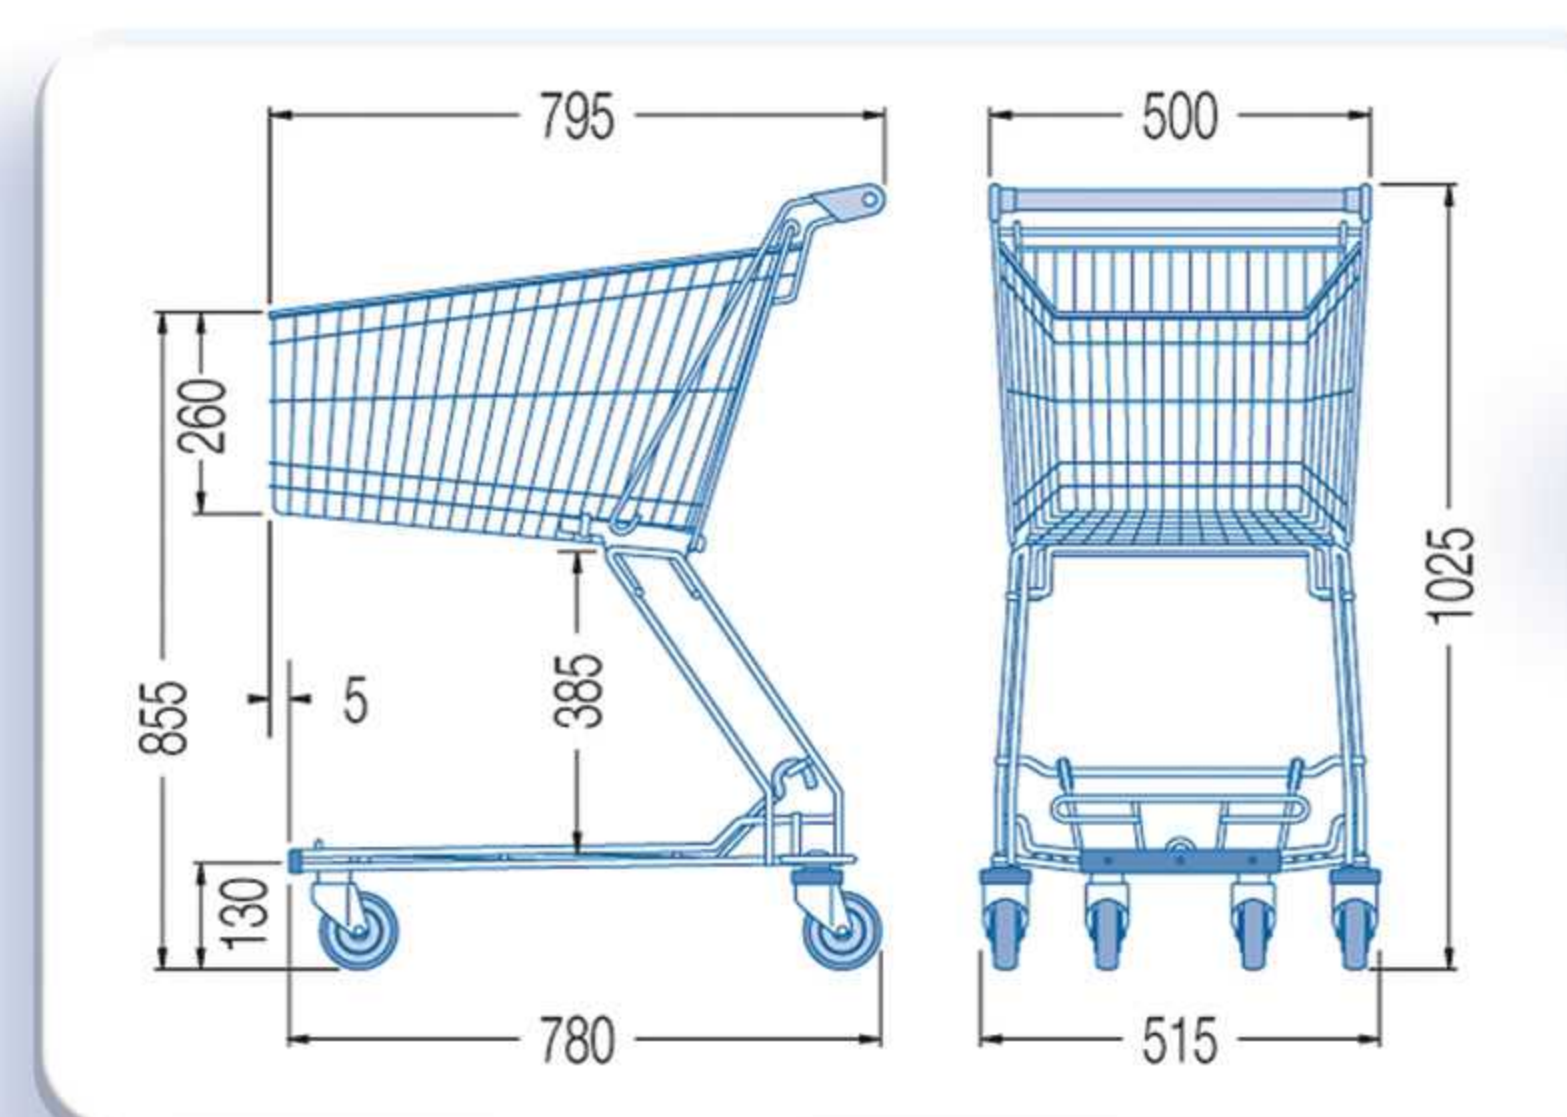

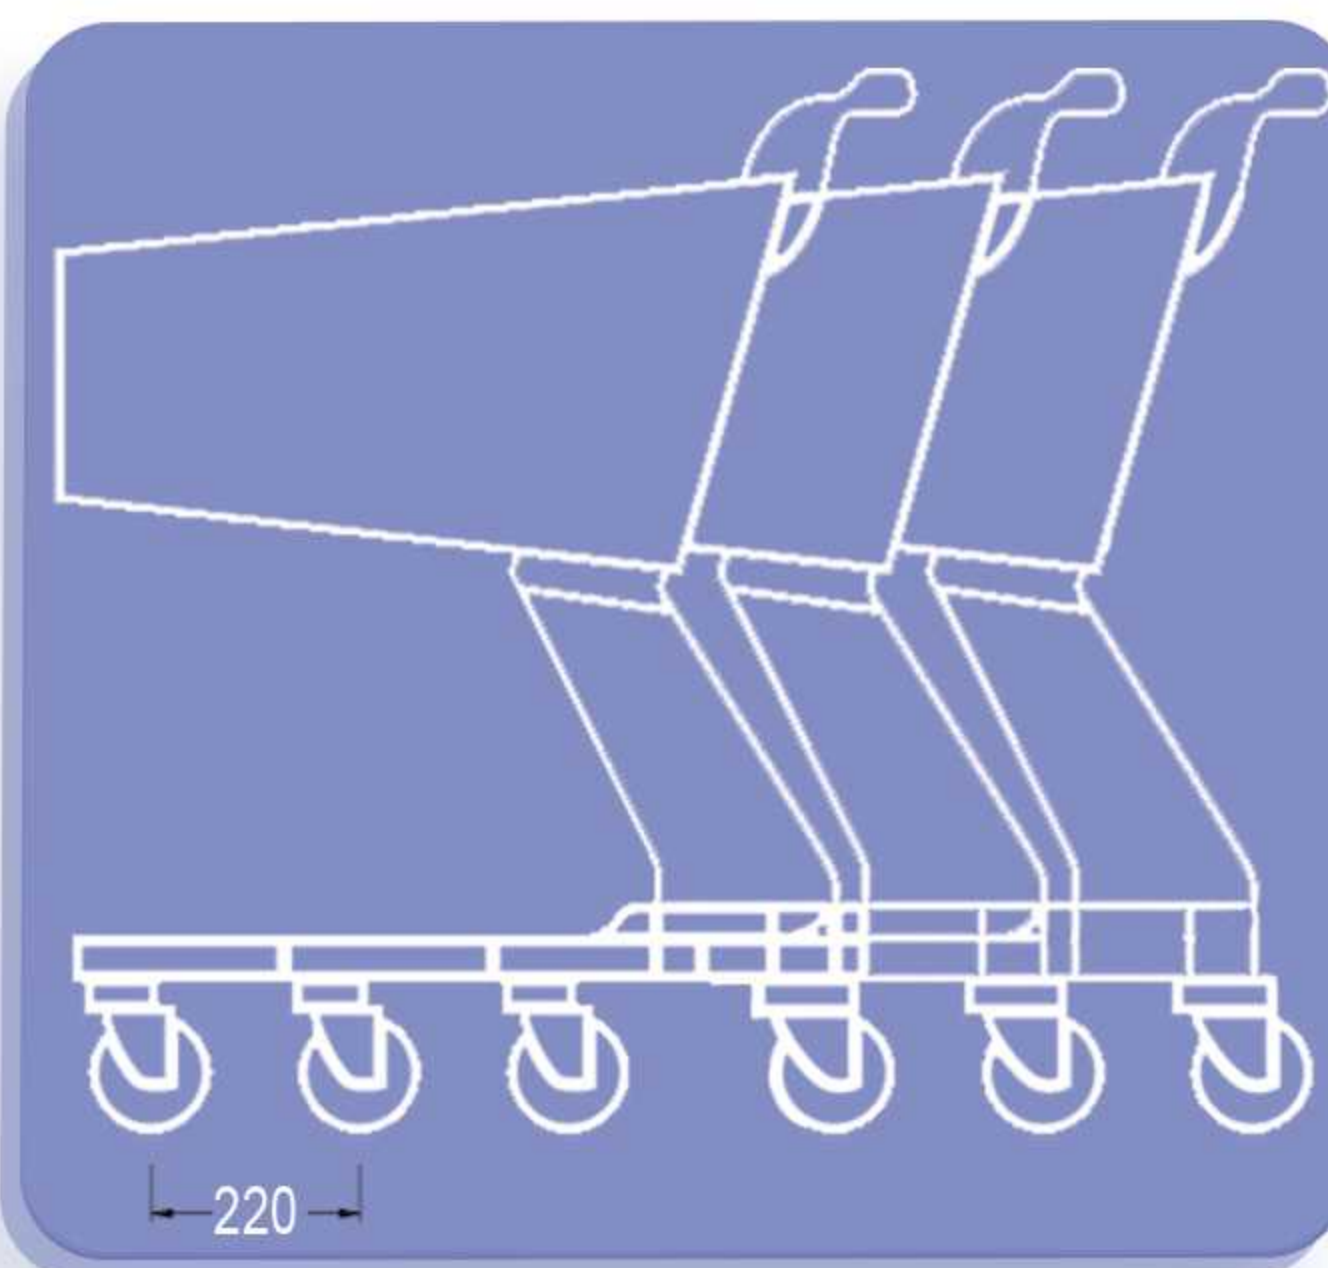

More utilities for special & luxury departments such as garment Boutique, Cosmetic, flower & gardening, chocolates and according to its base material of Aluminum composite and surface of Corian
The spatial geometric checkout structure
Pretty stylish Looks with fantastic lighting
Speed up next customer passing according to multi-separated basin
Wider conveyor for more loading
Easier Putting goods on the conveyor because of lack of any edge
Using Electronic boards (PCB) with many options, Status screen and Pretty stylish Looks
Predict in-counter devices such as Cash drawer, POS Scanner and ...
